UTAL MURDER F WOMAN NEAR SALADA BEACH

cers of San Mateo county are g every effort to unravel the y of the slaying of Mrs. Evelyn , whose body was found, tied eet, beside the road in a ravine alada Beach known as O'Malley last Saturday afternoon.

umber of clues are being fol- nd several suspects have either pprehended or are being kept surveilance by the officers, who clear up the mystery within a ys.

body of Mrs. Gerber, aged 32, ent of San Francisco, was dis- d lying in a ditch, where it is t it had been hurled from an bile. The body was discovered Morrissy, a rancher, who was cows in that vicinity.

rissy notified Constable S. A. i of Colma, and Sheriff T. C. ern, who had the remains re- to the W. C. Lasswell & Co. ry establishment in Daly City. an autopsy disclosed that death ue to strangling. Indications hat it had been the climax of a attack in which the young 's face was disfigured by crush- ows, one arm being broken and est crushed.

Gerber, who was also known na Moore, seems to have led a life. This was indicated when s searched her apartments at 'Farrel street, San Francisco. ers found there showed that one he life of Eve Gerber, music t of irreproachable reputation nduct; the other was that of a girl" of hte half-world, under me of Mona Moore, the pretty woman who consorted with men d by the law.

ong the letters were found some relatives and from friends of etter life, revealing that these s knew nothing of the other f the "butterfly" whose charms he lure of admirers in a totally nt social world. Her parents in Grays Harbor, Washington.

manager of the apartment the unfortunate woman resided he officers that Mrs. Gerber had lers except two music teachers, hat the life of the girl was a one so far as others in the ent house knew.

riff T. C. McGovern and his and Constable S. A. Landini are g every effort to run down the rtators of this brutal murder, it is confidently expected that uilty parties will be brought to e.

e body of the murdered woman is e mortuary establishment of W. sswell & Co., awaiting instruc- from her parents.

MENTED MAN HURLS ROCKS AT INTERURBAN CAR

the motorman of a San Mateo urban car was proceeding toward ity, he was somewhat surprised , at Lomita Park, a man began ing rocks at the car, one of the les barely missing the motorman. e man, who gave his name as Gaugh, was captured by the con- or and motorman and turned over onstable S. A. Landini.

onstable Landini brought Gaugh aly City, and when arraigned be- Judge Ellis C. Johnson, he ad- ed the throwing of the rocks, de- ng that the motorman "was ing fun of me." He also admitted g the course of his questioning he had been in the Stockton in- asylum two years ago.

a result of his actions and his ission of his former retention at asylum, Judge Johnson decided to Gaugh over to the Sueprior rt for examination as to his ty.

MESTIC TRAGEDY VICTIMS ARE BURIED SIDE BY SIDE

he remains of Clarence Letcher, lthy automobile dealer of San , and his wife, Mrs. Helen Letcher, ds of a domestic tragedy where- Mrs. Letcher killed her husband then turned the gun on herself, e buried side by side at San Jose Tuesday. The tragedy was the ax of a quarrel, following a trip San Francisco, in which Mrs. cher is said to have followed her band to a Van Ness apartment, er he had told her he was going on nting trip.

Frederick Menge Passes Away

Frederick Menge, a resident of Daly y, passed away on July 4. The eral was held from the mortuary apel of W. C. Lasswel & Co., on dnesday. Interment was at Cypress wn.

LOCAL EDUCATORS ENJOY VACATION

This is the joyous vacation time for the teachers in our local schools, and most of them are taking full advantage of the opportunity to rest up from the strenuous work of the past season, and prepare for an even more vigorous campaign during the coming school session. The members of the faculty have scattered far and wide, and in various ways are making good use of the summer vacation.

Mr. N. O. Best, Principal, left on Thursday of last week to spend his vacation on the Russian river.

Miss A. Albushie, girls' physical education teacher, is enjoying a visit with he rparents in Washington.

Miss A. Anderson, Scienee, is also with her parents in Washington.

Mr. C. K. Binkley, English teacher, is utilizing his vacation in the development of his farm in Lake county.

Mr. C. Cooley, boys' physical educator, is just now visiting with his wife's parents in Nebraska, but expects to attend summer school in the East.

Miss M. Dannenbaum, Civics, is spending her vacation with her parents in Kansas.

Miss E. Torello, Mathematics, took a trip to Arizona and is now spending a few weeks with Miss B. B. Hoover, Home Economics, at Sea Bright, near Palo Alto.

Miss M. Robinson, Bookkeeping, is with her parents in Grass Valley.

Mrs. P. L. Warner, History and Typing, is traveling through Canada, and is reported to be having a wonderful trip.

Mr. I. L. Healton, Foreign Languages, is on his father's farm at La Habre, California.

Mrs. Brown, History and Typing, is enjoying a rest on her father's farm at Ferndale, near Eureka.

Mr. F. Kleemeyer, Auto Shop, was at Clear Lake, but had his vacation cut short when an emery wheel on which he was working flew to pieces, and one of the pieces cut his forehead, making a deep gash. He returned to Daly City immediately, and now a scar is all that is left to remind him of the accident.

Mr. D. Mork, Commercial, is in Mt. View.

Miss Dorothy Staib, English, and Miss E. Potter, Art, are traveling through the East. They have visited St. Louis, Washington and other large cities in the Middle West and the East. They have been visiting the schools and art galleries all along the way. They plan to finish their trip by visiting the sesqui-centennial exposition in Philadelphia.

GRACE PRESBYTERIAN CHURCH

The bible theme for next Sabbath evening at Grace Presbyterian church will be, "Why it Costs too Much." The people everywhere are growling because it costs too much to live, and because wages are so low, and whose fault is it, and so on. Come and let us look at it from an economic standpoint.

The Daily Vacation Bible school closed last Friday with a fine picnic at the Boy Scout grove, and a royal good time was had, and the work done by those who attended the school was viewed by the congregation of the evening service. Fifty-eight people attended the school from very many homes, and all wished that it might continue longer.

Rev. Mr. Congdon preached at the Grace church last Sabbath evening and gave a very interesting sermon on "God's Handiwork." Mrs. D. T. Bentley sang a solo, "The Penitent," and was much appreciated. Mr. Stotts sang "I'm Nearer Home Today," and all enjoyed Mr. Stotts' singing.

The church is what the people of this community make it, for God is willing to do more than His part, but He works through human agencies, so must rely on the faithfulness of His children.

You can't saw wood with a hammer, so don't knock but boost, for we need the help of all during the vacation season.—Chas. H. Gatchell, Minister, Phone Delaware 1544.

BOOSTING LEGION AUXILIARY

Before the close of the present year, Mrs. Eliza Shepard, sister of the late Jack London, the novelist, and the national president of the Women's Auxiliary to the American Legion, expects to visit every state in the Union in the interests of her organization.

Mrs. Shepherd has just returned to her home at Glen Ellen from a two months tour of the eastern states on official business for the auxiliary. She was called home in business connected with the big Jack London ranch, which her brother made famous in his book "The Valley of the Moon." Mrs. Shepard is to leave for Indianapolis this week to attend a convention there.

Fourth of July Outing

All the tasks completed and plans for another year carefully laid; all the financial obligations for the end of one and the begining of another fiscal year provided for; then the longing for a change of air and scene was permitted to take control of the mind.

Where to go and stay from the first to the seventh of July was the question for solution.

California's numerous pleasant resting and renewing resorts, all alluring and worthy, claimed attention.

After thoughtful consideration of what was needed most, Duncan Springs, where Mt. Duncan stands guard, near Hopland, a hundred miles from home, was chosen.

Its clear, dry air, warm sunshine, beneficial waters for drinking and bathing, comfortable quarters, sanitary and sustaining table, and sincere gratefulness of host and hostess were recalled and the choice was made.

There the writer spent his Fourth of July and and celebrated the sesquicentennial.

The Northwestern Pacific afternoon train of the first dropped him there a little after 7 o'clock. The same train will favor anyone else in nearly the same way any day.

A few minutes in the spacious dining room served to satisfy the demands of appetite, and then on the wide porch and in the spring pavilion numerous regular habitues of the place extended to him the hand of welcome, and more than one said: "We knew you would come."

Such a welcome gives one both comfort and confidence and provides the feeling that an annual vist to Duncan Springs is a social duty, as well as a preventative of physical pains and aches.

Numerous regulars were noticed, a number of them having spent a fortnight or more there every summer for more than a score of years, and all of them look well, eat heartily, step lightly, and never complain, despite the lapse of time.

One who sat at the writer's table was eighty-four. He never missed a meal nor failed to partake of the full service. His conversation was agreeable, he made his regular hikes, played shuffle-board with precision and enthusiasm, drank the magnesia, the soda, and the sulphur waters, and took a hot soda water bath every second day.

He praises the bridge that carries him over. He will find rejuvenation at least, once a year, at Duncan Springs as long as he lives.

The old were not the only ones present. The midle aged were well represented, as were the young and jolly, whose only trouble is excess of life. Besides, the voices of children at play mingled with the songs of the birds.

All drank of the waters, followed the scenic pathways, basked in the ever generous sunshine and ardently awaited every ringing of the dining room bell. It is actually surprising the relish all had for every dish set before them, three times a day.

Every night there was a dance at the spring pavilion. On the evening of the Fourth a genuine celebration took place there. More than a hundred were present. The chairman made a dignified opening address. A white-haired, patriotic comedy actor and singer of other days recited Lincoln's "Gettysburg Address," winsome young ladies exemplified jig dancing and the Charleston and sang popular songs, waggish men told comical stories calling forth bursts of merriment, ambitious youngsters spoke their pieces with elocutionary skill, and all awaited for the Fourth of July oration which was the part of the writer.

All the others had done very well. His reputation was at stake. The setting was fine and the interest of the audience was intense. He chose the "American Experiment" for his theme, and, perhaps it was the water or the spirit of Mt. Duncan, for great thoughts in charming words never favored him so well before. He traced the "Experiment" from its daring beginning in the Declaration of Independence, down to the present day, when it has encompassed and controlled the world. His last thought was: "With the wealth of the world, inside the limits of our country, let us not forget that all men were created equal." It is needless to say that Jefferson School District was highly honored by the applause that followed.

Thus the outing was made memorable for the sesqui-centennial year, and the account of it is written, not for vanity's sake, for the writer has no selfish ambition to achieve, but he does wish to let those who were not free to have an outing know how he spent his opportunity. It is his sincere wish that all may have, in the near future, the freedom to make a trip to some charming location like Duncan Springs.

W. J. SAVAGE.

NAVY CHIEF BANS BAY BRIDGE PLAN

A bridge across San Francisco bay north of Hunters Point will be a detriment to movement of naval vessels in San Francisco bay and interfere with activities of the proposed naval base at Alameda, Secretary of the Navy Wilbur has informed the war department.

Secretary Wilbur, in a letter to the secretary of war, transmission of which was reported to the San Francisco Chamber of Commerce Wednesday by its Washington bureau, urged that the ruling made in 1921 forbidding construction of a bridge north of Hunters Point, be adhered to.

The fate of the bridge plan now depends upon the ruling to be made by the war department.

The war department, before ruling on the application of the San Francisco board of supervisors for modification of the 1921 ruling, asked the navy department what it thought of the bridge plans. The sentiment in the war department is understood to have been favorable to the bridge.

A favorable ruling may still come from the war department, the Chamber of Commerce pointed out.

"The mention of the Alameda naval base gives us reason to hope for another advantage," said Supervisor Warren Shannon who interested himself in the bridge matter before the board.

"The long talked-of Alameda naval base may really be built after all. It would in a measure, compensate us for the loss of the bridge plan. When I talked with Major John W. N. Schultz, resident army engineer here, recently, he told me that the base plan would be the only thing, in his opinion, with which a bridge would interfere."

Home Entered by Robbers

The home of J. Jensen, at 498 Evergreen avenue, was broken into on July 4. Some jewelry was taken by the robbers, but they were evidently frightened away before they had an opportunity to make a thorough search of the premises. Marshal Doyle is following up clues and hopes to capture the robbers.

BERKELEY FERRY PERMIT GRANTED

The long fight for a San Francisco-Berkeley ferry service was won last Wednesday, when the State Railroad Commission granted the Golden Gate Ferry Company permission to start vehicular service between the two cities.

"We will begin operation within seven months, with 17 minutes running time from pier to pier," O. A. Stewart, president of the Golden Gate Ferry Company, announced. "We have placed orders for three new electric Diesel-engined ferries, and intend to start pier construction in Berkeley at once.

The commission's permit allows only the transportation of vehicles and their passengers. It does not grant permission to carry foot passengers.

Service must start within eighteen months, and the company is required to file bi-monthly reports of progress in building, etc., preliminary to actual operation.

The new service is necessary to handle from 18 to 20 per cent of the present transbay auto traffic, and will be necessary to handle future service, which is growing at the rate of 12 per cent a year acording to the commission's statement accompanying the permission.

"We will operate from the San Francisco dock at the foot of Hyde street to a new pier at the foot of University avenue, Berkeley," Stewart said. "Plans have been prepared for a pier and causeway 18,000 feet long in Berkeley. It can be built with but little delay.

"Our rates will be the same as charges by the Southern Pacific in its Oakland ferry route—60 cents for autos and 5 cents for passengers. The three ferries just ordered will each carry eighty-five machines."

Fight for the permit to operate a San Francisco-Berkeley ferry has been carried on by the Golden Gate Company for more than a year. The first application for a certificate of convenience sought the right to carry foot passengers as well as vehicles.

VOTERS ADVISED TO REGISTER NOW

"Have You Registered This Year? July 31st is the last day to register for the Primary Elections."

The above reminder is stamped on each envelope mailed from the office of County Clerk Elizabeth M. Kneese these last days of registration. You must be registered since the first of January, 1926, in order to vote at the August primaries.

And if you have moved since you did register, be sure that you tranfer your registration to your proper precinct. This must be done on or before July 31st, too.

For the convenience of the voters throughout the county, County Clerk Kneese has appointed deputies in the various cities to enable everyone to register.

Following is a list of those appointed in Daly City:

Ellis C. Johnson, City Hall.

Mrs. Ella McKee, 39 Irvington street.

Mrs. May E. Hawkins, 139 Knowles avenue.

John J. Fahey, 6284 Mission street.

Mrs. Ida Preston, 209 Woodrow street.

B. C. Ross, City Hall.

Mrs. Catherine Reinhart, 1056 Brunswick street.

Pick out the one most accessible to you and go and REGISTER NOW! You have just twenty-two days more. Don't delay!

The total registration for Daly City at the close of the books for the municipal election was 1,396, and since that time no additional registrations have been received at the county clerk's office. Some few have registered with the various deputies in Daly City, but the registration at the close of 1924 was 1,591, so that, with the increase in population during the last two years, there are still a number of electors unregistered.

This is a duty you have to perform for yourself. You can't let "George do it." Exercise your great American privilege, and register today!

SALINAS IS PREPARING FOR ANNUAL RODEO

With comfortable new stands having almost double seating capacity of former years, and with many new and startling events added to the attractive program, the fifteenth annual California Rodeo, to be staged at Salinas, July 21 to 25, inclusive, promises to be the greatest Wild West show in the entire country.

The wild cow milking contest, a new feature, is one of the greatest attractions. A display of the winning stock horses from the leading horse shows in the country is another.

Already the city is rapidly filling up with cowboys, all anxiously waiting for the big roundup to get under way.

In addition to the new grandstand, new barns have been constructed in the Rodeo field for twice as many horses as heretofore.

Although there are over a thousand new hotel rooms in Salinas and on the Monterey peninsula, every private home is making arrangements to house some visitors.

HEADLIGHT ADJUSTMENT WILL SAVE MUCH TROUBLE

See that your lights are adjusted when you start on your trip into the mountains, and that your camping equipment is properly loaded.

This advice is offered to motorists about to make their annual vacation trip, in a bulletin issued by Will H. Marsh, chief of the Division of Motor Vehicles.

"The law requires that your headlights furnish sufficient illumination for you rsafety, but that they do not project a glaring or dazzling light," Marsh's bulletin says. "Be on the safe side and have them adjusted before leaving."

Concerning the loading of camp equipment, the bulletin advises that the law prohibits any load extending beyond the hub caps on the left or more than six inches beyond the hub caps on the right. "Many motorists fail to load their equipment properly and serious accidents result on grade curves," it adds.

Motorists are also asked to cooperate in the prevention of forest fires by avoiding the use of the muffler cut-out and using care with cigarettes, matches and gasoline.

Fined For Bootlegging

Extreme youth saved the purse of Olga Sereni, Colma, charged with bootlegging, when she appeared before Justice of Peace Griffin for trial on Wednesday. Because of her youth, members of the federal prohibition squad recommended that the justice be lenient with her. As a result she was fined but $100, while six men who appeared before the justice with her drew fines of $300 each.

PUBLIC UTILITIES DISTRICT PLANNED

An election for the formation of the East Palo Alto public utilities district is asked in a petition presented to the county supervisors at Redwood City last Tuesday by Attorney Joseph B. Gordon, of San Mateo, representing ninety-five property owners in the district northeast of Palo Alto, who signed the petition. The object of the district is to provide electric light, sewers and other public conveniences.

Representatives of the Ravenswood area, in the same general locality, also asked permission to form an improvement district for the purpose of supplying street lighting. The area proposed to be incorporated in the two districts overlaps at one point, it was found. A hearing on both proposals was set for the next meeting of the board, July 19.

The supervisors passed a resolution favoring the removal of the present Beresford crossing of the Southern Pacific railroad, a short distance south of the present crossing. The move will be made as a safety measure and to permit development of a real estate tract adjoining the present crossing, it was stated.

Discharge of the special committee appointed to investigate rebuilding of the old Las Pulgas road from Belmont to the Woodside road was requested at the Tuesday session of the board. The committee, headed by Charles H. Holt, of Redwood City, reported that it had completed its work of preliminary survey for the road, and was discharged with thanks by the board.

COURT'S DECISION FAVORS HIGHWAY

The right of county supervisors to extend roads through incorporated areas in Californa has been upheld by the State Supreme Court, which means that work on rebuilding of the old Alameda de las Pulgas road from Belmont to the Woodside road will be under way within the near future.

Report on the decision of the court was made last week by a committee headed by H. C. Tuchsen, of Redwood City, appointed some time ago by the county supervisors to arrange plans for making a paved highway along the right-of-way of the old road, which dates back to the days of Spanish-California.

The committee reported two weeks ago that preliminary surveys for the road had been completed and that further work on the project had been halted, awaiting the decision of a test case before the Supreme Court.

The decision means much to San Mateo county, where several road projects are pending, especially the Las Pulgas road, for which many petitions have been received. The right-of-way for the old road extends east of San Carlos and follows a scenic route through the foothills. Rebuilding of the old highway would provide relief of congestion along the main Peninsula highway between Belmont and Woodside, and give an outlet to the south for traffic from Half Moon Bay and other coastside points without having to use the main highway through Belmont.

CONCERT AT HILLSBOROUGH NEXT SUNDAY AFTERNOON

The San Francisco Orchestra, with Alfred Hertz, its permanent conductor, is to present the following program at the Hillsborough school grounds on Sunday afternoon, July 11, at 3:15 o'clock:

Overture to Tannhauses.....Wagner
Symphony in B Minor, "Unfinished" ..... Schubert
Hungarian Rhapsody, No. 2....Liszt
Symphonic Suite, "Scheherazade".. ..... Rimssky-Korsakow

Throngs of train excursionists and motor parties have attended the preceeding concerts, and even larger attendance is expected on the coming date.

Mr. Hertz ranks as one of the foremost orchestra conductors in the United States and has held the post of director of the San Francisco Orchestra over a period of many years. His ability and popularity are well known and held in high esteem by music-lovers everywhere. A royal welcome awaits his appearance with his own orchestra on July 11.

WOMAN FOUND DEAD

Mrs. A. McGlashion was found dead in her home on School street on Saturday, July 3. Mrs. McGlashion was a pioneer resident of Colma, having lived there for the past twenty years. The funeral was held Monday afternoon from the mortuary chapel of W. C. Lasswell & Co., with cremation at Mt. Olivet.

Hardware Sale

Daly City and Crocker People Take Notice

—I am about to turn over my Harware business to Mr. C. A. Turner. Before I do this, I would like to show the people of Daly City and Crocker that I appreciate their past patronage, so Mr. Turner has given me permission to make a SALE FOR TWO WEEKS ONLY.

Here is Your Chance

TEN PER CENT OFF on every dollar purchase in Hardware, Paints, Oil, Silverware and Household Goods.

Here Are Some Items

8-Quart Bucket ..... 20c **Union Made Brooms 45c**
100 ft. Clothesline $1.00 **Clothes Pins....3c dozen**
All these 10 per cent off

Governor Pinchot is the designer of an improved fishing rod, but what he really needed was an improved bait for voters.

CERTIFICATE OF INDIVIDUALS TRANSACTING BUSINESS UNDER A FICTITIOUS NAME.

THIS IS TO CERTIFY that we, the undersigned Joseph D. Altieri, Joseph Belli, Urbano Granucci and M. J. Soldavini, are co-partners transacting business in the State of California, under the firm name and style of M. Belli & Company, Belli Motor Company, Colma Motor Car Company and Pioneer Truck Tire Company; that the principal place of business of each of said co-partnersips is situated in the Town of Colma, County of San Mateo, State of California, and that the names of each of the members of said co-partnership, and their respective places of residence are as follows, to-wit:

Joseph D. Altieri, Colma, County of San Mateo, California;
Joseph Belli, Colma, County of San Mateo, California;
Urbano Granucci, Colma, County of San Mateo, California;
M. J. Soldavini, Colma, County of San Mateo, California.

JOSEPH D. ALTIERI.
JOSEPH BELLI.
URBANO GRANUCCI.
M. J. SOLDAVINI.

STATE OF CALIFORNIA, County of San Mateo. } ss.

On this 28th day of June, A. D. 1926, before me, Angelo J. Scampini, a Notary Public in and for the County of San Mateo, State of California, personally appeared Joseph D. Altieri, Joseph Belli, Urbano Granucci and M. J. Soldavini, known to me to be the persons described and whose names are subscribed to the foregoing instrument, and they duly acknowledged to me that they executed the same.

IN WITNESS WHEREOF I have hereunto set my hand and affixed my official seal at my office in the County of San Mateo, State of California, the day and year in this certificate first above written.

(Seal.) ANGELO SCAMPINI.
Notary Public in and for the County of San Mateo, State of California.

CAMPERS AND FOREST FIRES

California campers are asked to carry shovels in the latest appeal sent forth in the campaign to decrease the number of forest fires in this state.

American Legion posts throughout the United States have been asked to take a hand in the movement to cut down the number of forest fires caused by careless campers, according to State Adjutant James K. Fisk.

Fisk has received some startling statistics from Charles G. Dunwoody, forestry expert with the California Development Association and chairman of the American Legion's state committee on conservation. According to Dunwoody, there have been 109 man-caused fires in this state thus far this year, as compared to twenty last year. Timber destroyed this year totals 32,000 acres, as against 3,974 acres last year.

Each post of the Legion has been requested to organize a volunteer squad of ex-service men to serve on holidays throughout the summer months. These volunteers will be given the task of cautioning campers and automobile parties against fire carelessness as they pass through the communities in which the Legion posts are located.

Eve never taunted Adam about the number of men who had proposed to her.

One way to get unpleasant things out of one's system is to keep a secret diary.

Father's Day didn't make a whale of a lot of difference to most fathers.

A *State Commission* regulates rates and service of Public Utilities in California.

Hydro electric companies come under the jurisdiction of this Commission.

Rates are fixed and service details established after open public hearings and after the Commission has taken the advice of its own experts—engineers, lawyers, statisticians and economists.

Rates in California are low.

Service is a model for the rest of the United States.

Since 1913 the average per capita cost of living increased 65%, while the average cost of electricity decreased 8%.

Eat Less and Live Longer, Says Lawyer

By W. W. O'BRIEN
(Noted Criminal Lawyer of Chicago.)

W. W. O'Brien.

Business and professional men working under high nervous pressure do not live as long as men whose pursuits keep them out of doors and active. Examine the records of longevity and you will find that on the average the longest-lived men are soldiers, sailors and farmers, all avocations which tend to keep a man at his physical best.

Man, in general, rolls down the hill of life fastest when his figure is rotund. "Leanness and longevity" is a good axiom for business men to remember. If office workers would eat a little less, they would add years to their lives.

Overfeeding is as dangerous to adults as underfeeding is to children. Foods difficult to digest, or which overstimulate, should be avoided by persons whose work does not require any particular amount of physical exercise. Yet thousands of business men eat as much as or more than men who do manual labor. And, inevitably, nature rebels and sickness results.

Many of the country's foremost executives eat but two meals a day, breakfast and dinner in the evening. They seek to keep the organs of the body from becoming clogged. Thousands of other business men confine themselves at noontime to custards, puddings, soups and other sustaining dishes made with milk, or evaporated milk, which is milk in its most sterile form, from which 60 per cent of the water has been removed by evaporation. Such a diet is light and readily assimilated.

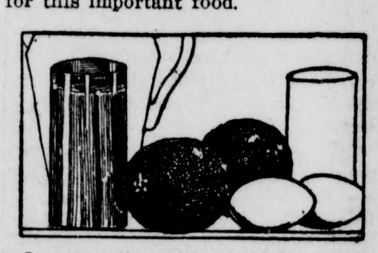
There is no more necessary lesson to be learned by the brain worker than how to keep well and healthy by proper attention to food habits.

Eating Greater Cause of Death Than Drinking

Drink is the second greatest cause of disease and death. Food comes first, then drink. Excluding alcoholic beverages, there are dozens of drinks on the market today whose effect is detrimental, particularly to children.

Milk is the best drink for children. Not only is it drink, but food as well—the most nearly perfect food known to man.

Milk is an all-the-year-round drink and for this reason the children often rebel against drinking it. This condition, however, may be overcome by the introduction of the mixed drink. Milk or diluted evaporated milk may be mixed with eggs or used in fruit juices or in some other way which will disguise the fact that the drink contains milk. In the hot summer months when the child naturally drinks more than in cooler weather, it is wise to vary the ways of serving milk, so as not to create a distaste for this important food.



In connection with mixed drinks, the following formulas for milk beverages may aid mothers in serving something new:

Iced Cocoa

3 tbsp. cocoa
2 tbsp. sugar
¼ cup hot water
Few grains salt
1½ cups evaporated milk diluted with
1½ cups water
¼ tsp. vanilla

Scald the diluted milk in a double boiler. Mix cocoa, sugar, salt and add the hot water. Cook over a low flame from 10 to 15 minutes, stirring occasionally to prevent burning. Add to the cocoa the scalded milk; return to the double boiler and continue cooking for 10 minutes. Add vanilla, chill before serving. Pour into tall glasses which contain a few small cubes of ice. Serve plain or top with whipped cream sprinkled with cinnamon. Serves four.

Egg-Nog

1 egg
Few grains salt
1 tbsp. sugar
Few gratings nutmeg
2-3 cup cold evaporated milk diluted with
2-3 cup ice water
2 tbsp. berry or cherry juice or
2 tbsp. non-alcoholic sherry

Separate white from yolk of egg. Add salt to white and beat until stiff. Beat yolk until thick and lemon colored and add the fruit juices, nutmeg and sugar. Combine diluted milk with yolk mixture. Pour into a tall glass and put the egg white on top. Sprinkle top with chopped nuts and serve at once. Serves one.

Orange-Nog

½ cup orange juice
Few grains salt
2 1-3 tsp. sugar
1-3 cup evaporated milk diluted with
1-3 cup cold water

Add sugar and salt to orange juice and pour slowly into the diluted milk, stirring to mix thoroughly. Chill before serving. One-half tsp. lemon improves this drink for many. Serves one.

SIDELIGHTS

By Marcy B. Darnall

Another international matter has been settled, to the satisfaction, it is hoped, of an anxious world. Count Lannoy, grand master of the house of Queen Elizabeth of the Belgians, has issued an official statement denying that the queen has had her hair bobbed. Incidentally, he explains that "if Her Majesty looks as though her hair were shingled, that is because of the skill of her hairdresser, who is able to make the queen's hair appear as if it were cut; but no scissors have touched the hair."

A nervous correspondent of the New York World demands that stamp-moistening devices be installed in post offices, to eliminate the "unsanitary and dangerous" habit of licking the stamps with the tongue. It is unspeakably sad to think how our cemeteries are being filled with vicitms of the stamp-licking habit.

A noted educator suggests that we should make our ignorance "selective," meaning that inasmuch as no one can become informed about everything, we should deliberately select those subjects of which we are content to remain in ignorance. For most of us these would make quite a lengthy list.

Lower mathematics for school girls is recommended by the Kansas City Post, among the problems suggested being that of budgeting the income of a husband who earns about $25 a week. If one might be taught how to provide for groceries, clothes, rent, gasoline, cosmetics, haircuts and other necessities out of such an income, with enough left over to pay the installments on the car and furniture, it would be of more practical benefit than a knowledge of trigonometry, or even calculus.

Recent alarming reports of the growing hatred of Europeans for the United States are to some extent counteracted by favorable news from Germany. The Germans have come to like American chewing gum so much that the duty has been reduced two-thirds so as to encourage greater importations.

According to a press report, twenty Republicans engaged in a free-for-all fist fight in San Antonio, Texas. The story naturally caused readers to wonder how they ever got so many Republicans together in that Democratic stronghold.

Still another route to movie stardom has been blazed. Robert W. Savage, football player and poet, infatuated by the charms of Clara Bow, screen actress, who rejected his love, made an unsuccessful attempt at suicide a few weeks ago. The notoriety achieved has aided in securing for him a six months' contract as a star at $1,000 a week—so it is said.

An admiring editor recently referred to Senator Cole Blease as "the South Carolina statesman." This brings to mind the story of the meeting in the road of a Ford and a mule. The mule asked, "What are you?" "I'm an automobile," replied the Ford, "and what are you?" The mule said, "I'm a horse." Then they both laughed.

REGISTRATION CAMPAIGN

With an overwhelming number of signatures obtained for the gasoline tax initiative petition, the campaign committee of the California State Automobile Association and the County Supervisors' Association of California is now concentrating its efforts to bringing up the registration of voters, according to an announcement made today.

Figures obtained on a recent check up of registration totals throughout Northern and Central California show that the present registration is but slightly over 78 per cent of the total registration for the 1924 presidential general election. Some counties have practically reached the total of two years ago, while others are lagging considerably behind the figures for the last general election.

The Automobile Association and the Supervisors are planning sectional educational campaigns in all counties which are behind in registration. This campaign will be conducted energetically from now on, and it is expected that by the time registration for the August primaries closes on July 31, the total of registered voters in Northen and Central California will be brought up to the figure for the general election of two years ago.

If this goal can be reached, it is believed that registration for the November election can be brought up to a point considerably in excess of the 1924 figure, according to a statement issued by H. J. Brunnier, chairman of the highways committee of the State Automobile Association.

Registration for the November election will close October 2.

In San Francisco good results are being obtained from the house to house canvass inaugurated recently by Registrar Harry Zemansky, and present indications are that the San Francisco voting strength will be up to the maximum when the registration period closes.

A MODERN HELP

One of the greatest benefits of modern times is the up-to-date laundry. The hours formerly spent in hard, unpleasant work are now given to woman-kind, free from all the drudgery of wash-day, and the exhausting labor of ironing piles of clothes every week has been banished from the life of every modern housewife. The laundry has in this way added two days to the week of the present-day woman. The scientific cleansing processes of the modern laundry assure the highest quality of perfection in cleanliness, purity and finish.

The San Francisco Laundry, located at 1490 Turk street, whose phone number is West 793, is one of the finest examples of what a laundry should be. This well-known concern has been established since 1868. Soft water is used here, and this fact with their modern equipment, enables them to turn out the very best class of laundry work. This means that the clothes are brought back in all their original richness, means sweet smelling, clean white linen, and that the most delicate garments may be sent to them in perfect safety. They offer a complete service for all your washing, and every piece is returned spotlessly clean and beautifully finished at a nominal cost. Shirt and collar service is a specialty with them. Men who appreciate collar comfort and style send their collars to them, as a correctly laundered starched collar gives a neat and well-dressed appearance to any man. Their special facilities for cleaning fine blankets, comforts and curtains insure the finest kind of finished work. This modern and progressive landry solicits a trial of your work, and we believe you can do no better than entrust your work to its care. —Adv.

When in flight a common housefly beats its wings 330 times a second.

The thing that really hurts modern girl's pride is to tell her she is no more wicked than her grandmother was.

One can not always judge by pearances. A stick of dynamite harmless enough.

Having obtained the right to most women now exercise their not to use it.

Sergt. C. H. Campbell of Fort Houston, Texas, has a leopard as a pet.

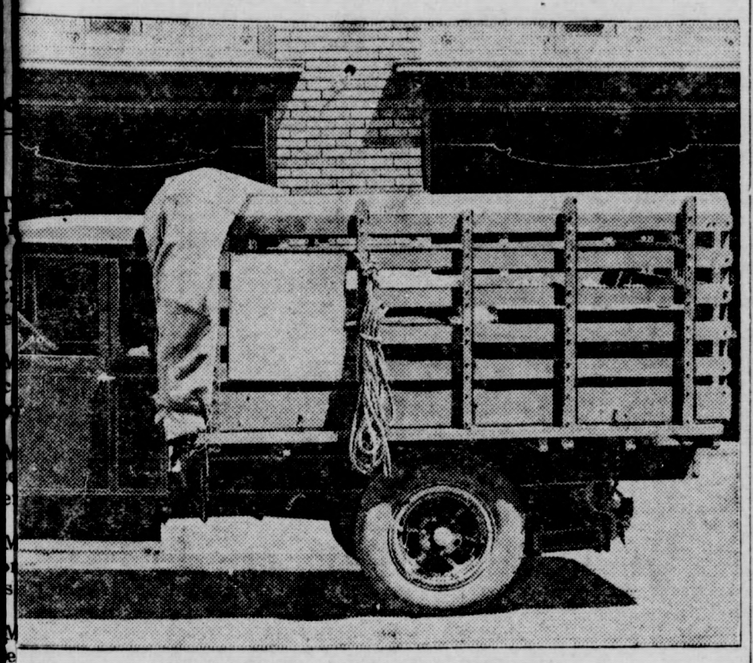
OVERLOADED TRUCK CAUSE OF TIRE WEAR



Truck Is Useful Implement on Most Farms

Overloading of trucks is the big use of excessive tire wear. Per- no part of the truck is subjected greater strain on overloads than tires.

Where pneumatics are used this ctice does as much damage to truck es as a complete disregard of the es of inflation. With regard to the er subject, the tire manufacturer's tructions on inflation of truck tires uld be observed consistently. Over- lation is, in most cases, as danger- as underinflation.

Even braking is necessary to obtain ximum wear and tear. Assuming n pull, the proper place to make t adjustment is at the brake band shoe, not at any other part of the chanism. Regular inspection of kes is necessary and an even con- t of the band at all points is requi- in good adjustment. Uneven con- t of brake bands is the cause of attering" when brakes are applied. erators can obtain full details con- cerning brake adjustments from the vehicle manufacturer's book of instructions.

A severe shock, such as results in striking a curb, may spring the knuckle rod, thus throwing the front wheels out of proper adjustment. This results in hard steering and excessive wearing of tires, either solid or pneumatics. In a case which recently came to my attention an operator completely ruined a pair of pneumatic tires on a 50-mile drive after a slight accident.

The front wheels should not be lined up exactly parallel. Tie rod adjustments should produce a "toe-in" of one-fourth to one-half of an inch in the front wheels (see manufacturer's instructions for exact dimensions and method of making adjustment).

Lubrication of all steering gear connections, including steering knuckles, at regular intervals, is necessary. The majority of "hard steering" complaints are due to a lack of lubrication.

ED TO YELLOW CHANGE FOUGHT

vitch of Tail Light Is Opposed by Majority of A. A. A. Clubs.

ince the adjournment of the sec- national conference on street and hway safety, the American Auto- bile association has conducted a vass of sentiment among its affili- d clubs as to the proposal made the conference to change the tail ts of automobiles from red to yel-

develops, according to A. A. A. dquarters, that the motor clubs eady heard from regarding this posed innovation are against it, take the position that such a nge, applying to 20,000,000 motor icles would cause untold con- ion on the highways and would itably tend to increase the toll traffic accidents.

Rank and File Oppose.

his was practically the one propo- ion on which the A. A. A. took is- with the recommendations made the committees of the Hoover con- ence and it was at the insistence ub executives that a decision on tail light was postponed. All de- opments since the conference in- te, it is stated, that the rank and of the motoring public stand by resolution adopted at the time the A. A. A. as follows:

That the secretaries of clubs, af- ted with the American Automo- association in convention as- bled hereby condemn the pro- ed change as being detrimental public safety and to the best in- st of 20,000,000 motor vehicle ers."

Railways Want It.

though no mention was made in resolution of the forces urging the nge, it was well known that the roads and the motor clubs were different sides of the fence on this portant matter. Notice has been ved by the A. A. A. that proper vision must be made for represen- on of the motorists before any com- tee that takes up this question further study, as provided by the ty conference.

tle Gasoline Needed to Run Baby Automobile

baby automobile, no longer than an is high, pulled into Washing- recently and sailed up to the cap- the end of a transcontinental tour San Francisco, says Popular nce Monthly. Its driver, Gus el of Alameda, Calif., was also designer of the sturdy little ma- e that scooted over mountains deserts that bother cars five times size.

has a four-cylinder air-cooled mo- nine speeds, electric lights and ter, and is equipped with airplane s. The wheel base measures 60 es, and the car weighs only 560 nds. It can make a speed of 80 s an hour on the track, it is med, and 65 on the road. After hing Washington the designer onstrated that his unique little could travel 52 miles on a gallon asoline.

New Air Pump for Tires

A relief from back and arm strain is the superiority of the novel foot

Easy to Pump Air With This Device.

pump shown in the illustration for compressing automobile tires, over the regulation hand-operated affair.

Projections on Fenders Likely to Injure Tires

Be careful that a sharp turn of the front wheels does not bring the tire in contact with a spring fender or bumper. As the wheel turns this projection will quickly cut through the tread of the tire. When the car is heavily loaded there is danger that in passing over rough roads the tires will be bumped or gouged by projections on the fenders. Bent or broken fenders may also be in a position where they will gouge the tires. Inspect beneath the fender and make sure that there are no projections which could strike upon the tire. You may find bolts rubbed smooth and bright by continuous rubbing on the tires. If a change is made to oversize tires, be sure that there will be sufficient clearance between tire and fender when the car is loaded to capacity. This is, however, provided by most car manufacturers.

Important to Keep Your Automobile at Its Best

See that your oil-pressure gauge operates at all times. If no pressure is indicated, stop and have your trouble remedied at once.

Keep sufficient good cylinder oil in pan at all times.

See that the radiator is kept filled with water.

See that front wheels toe-in five-sixteenths of an inch at front. Wheels should be checked occasionally for alignment to avoid tire wear.

Keep your battery filled with distilled water.

See that your generator charges sufficient amperage at all times to avoid battery damage.

If motor does not start promptly when starter is pressed, get out and discover the cause.

See that springs are greased occasionally.

Before starting set spark lever about one-fourth up sector.

CALIFORNIA NEWS BRIEFS

An old hunting rifle which belonged to Abraham Lincoln came to light among the early day relics at Sutter's Fort, when the historic fortress and museum was visited recently by the Rev. ig Chief Horse Eagle, 104-year-old Indian evangelist and friend of the martyred president. The aged redskin, internationally known as a revivalist as well as an Oklahoma chieftan who has smoked the pipe of peace with every American president since Lincoln, was visibly moved when the ancient rifle was discovered and placed in his hands. The weapon, according to information available here, was used "by Abraham Lincoln and Mr. Wilson during a hunting trip in 1848." Among California's forty-niners was "Mr. Wilson" and with him came the Lincoln rifle which happily found its way into the state collection of historic mementoes of the past.

Memories of the old days when the heroine at the risk of her life stopped a wildly plunging runaway team, were revived at Etna recently when Mrs. M. H. McCarthy, wife of the editor of the Western Sentinel, risked her life to stop a runaway. It was not a team, but a runaway automobile. The risk, however, was equally as great. The car, being cranked, jumped out of control and commenced a wild plunge down the hill on the main street. Sensing that the car would strike other automobiles and possibly cause a fatality, Mrs. McCarthy made a flying leap into the machine, grabbed the wheel and, throwing on the brakes, stopped the car as it threatened to crash into a row of parked vehicles, some of them occupied.

Work is well under way on the new $8000 expansion program at the Tulare County Fairgrounds at Tulare. The first project is construction of a high fenced inclosure around the new six-acre addition to the grounds which was recently purchased. The next step will be laying of paved sidewalks along the front side and main entrance to the fairgrounds. A number of other improvements are to be made later, but prior to opening of the annual fair in this city in September. The Tulare chamber of commerce each year adds to value of the grounds, spending $14,000 in a similar program last year.

Municipal ownership and operation of the water plant in Clovis has proven a success from the very inception in 1914 when the city voted $25,000 in bonds two years after incorporation. At the same time the city voted a like sum for a sewer system. So successful has been the municipal water ownership venture experienced by the city that all extensions and additions to the water service have been taken care of without the levying of a tax. The profit has been approximately $3,000 per annum, sufficient to take care of the needs as the city grew.

Not satisfied with having driven across the continent and back in twenty-three actuala running days, Wilbur Baldwin, 21, of Roseville is anxious to try a non-stop trip across the continent next summer and break a record. Baldwin, who lost both arms two years ago in a railroad accident here, covered 7,800 miles in his recent trip across the continent, which started as a publicity stunt for a make of automobile, but ended in a personal tour. Baldwin, by means of artificial arms, did all the driving.

Delhi is destined to become the home of the Silver King squab, besides the many other phases of agriculture carried on in the district and colony. This recent phase of farming is being developed in the fourth unit or Balico district by C. J. Janes, formerly of Hayward, who recently located here. He was engaged in the coast city in operating a large pigeon farm, consisting of 2,000 pairs of pigeons, which he is moving to Delhi, expecting to carry on in an extensive way the marketing of squabs.

The Napa State hospital had added more equipment with which to facilitate the handling of products grown on the hospital holdings for distribution among the patients of the institution at a considerable saving to the state. The latest project is a cannery which has been equipped on a basis sufficiently large enough to handle the fruits taken from the hospital orchards. A new retort has been secured and a modern sealing machine has been installed.

Aid from one of the national organizations established for the purpose of erecting hospitals is to be sought by the Richmond chamber of commerce in the erection of a hospital in Richmond, according to plans discussed at a recent session of the board of directors.

A hundred workers of the Betz Packing company, the concern that will pack the output of seven large packing houses of the Sebastopol Apple Growers' Union, will receive $90,000 in wages during the harvest season, which last about six weeks.

The American Legion's memorial hall now under construction at Merced, will be completed by August 14, according to a statement made by Emmett McNamara, commander of the post. A crew of interior workmen will arrive shortly. The building will cost in excess of $50,000 and will be dedicated this fall.

The prevalence of Volstead act violations comes in for special attention this year in safety advice for summer vacation bathers issued by the state board of health. "Don't drink liquor and then go bathing" warns the board.

Construction has begun on another new packing house for Shafter, Kern county.

Organization of a municipal band in Oroville is being sponsored by the Achaean Club of that city.

Services were recently held at Live Oak for the laying of the cornerstone of a new $15,000 Methodist Episcopal Church.

At a price of $12,500 the directors of the Cloverdale chamber of commerce purchased the old Citrus Fair association's pavilion.

Plans have been inaugurated by Karl Ross Post of the American Legion aimed at securing the 1927 state Legion convention for Stockton.

Organization of a volunteer fire department for the town of Gerber, has been completed. A fire siren has been ordered and will be installed soon.

The new community hall just completed at Coloma, was formally dedicated with a ball and community entertainment Saturday evening, July 3.

Approximately 4,000 delegates recently gathered in Stockton in attendance at the thirty-ninth annual convention of the California Christian Endeavor Union.

Work has started on the new $150,000 plant of the Exchange Orange Products company, on its recently acquired ten-acre site in the industrial section of Ontario.

The large reclaimed acreage below Schellville, Sonoma Co., known as the Jones ranch, owned by the Sonoma Land company, has produced a fine crop of hay this year, but the prices are low.

Counties in northern California are organizing solidly behind the California Farm Bureau Federation campaign to place the modified federal plan of state legislative reapportionment on the ballot.

A new Masonic temple, consisting of a lodge building and theatre, has just been completed at Roseville at a cost of $250,000, and is declared by leading architects to be one of the finest buildings of its size in the state.

The Williams and Colusa Parlors, Native Sons of the Golden West, will consolidate at a meeting held at Colusa July 13th. This will make Parlor No. 69 one of the strongest Native Sons' Parlors in northern California.

Construction of the Phillbrook valley dam in Butte county, at a cost of $250,000, is soon to be undertaken by the Pacific Gas & Electric Co. The dam will store 5,000 acre feet of water to be used in power generation at the Centerville and De Sabla plants.

Friends and neighbors of Alvin Johnson of Delhi, gathered in his alfalfa field recently and did a service for him by putting up his hay. Johnson was stricken with diphtheria recently, causing him to abandon his labor in the fields.

Orange growers of the Lugonia section of Redlands suffered a loss mounting up into thousands of dollars this year by floods washing through their groves. They plan to form a district and join with the city in constructing a storm water ditch system to care for future flood waters.

Boycott labels are being used by field workers of the state board of health, it was announced in a campaign to abolish the common drinking cup. Wherever the walking delegates of cleanliness and sanitation sees a tin cup hanging on a chain he licks and sticks a label reading: "Don't drink from this cup—it may carry disease."

The sum of $750 was realized from the benefit dance given on an open-air platform in Roseville for William Newsome, high school boy of Yuba City, who suffered a fracture of the backbone in an automobile accident. The goal is $1,000, and friends will continue their efforts, as that sum is considered necessary to assure the patient the proper care and medical attention.

The Anderson, Clayton company of Los Angeles and Dallas, has commenced construction of a cotton gin at Merced. The plant, embodying the latest improvements in ginning machinery, will have a maximum capacity of 50 bales each day and will be completed by September 1. The cost is estimated at nearly $50,000. The gin will probably take care of the product of 5,000 acres this year.

California can grow anything that grows in Florida, and that goes even for alligators. Armed posses were reported searching near Jackson, Amador county, for a large alligator seen in a reservoir which schoolboys use as a swimming hole. The saurian is believed to be the property of Dr. E. E. Endicott. The physician bought a baby alligator six years ago and it escaped shortly after its delivery at Jackson.

Announcement that the state government has spent $62,995.05 during the last two years, in efforts to bring about return to California of persons who decided they liked other states better was made today by the state board of control. The state will not spend money on every deserter of California sunshine, however. The money in question was used in extraditing murderers, robbers, burglars, forgers and other persons charged with felonies.

A contract was awarded for the erection of a twelve-room addition to the Washington school and a six-room two-story addition to the McKinley school in the San Leandro school district. The improvements will be of reinforced concrete and will cost $135,000.

With a view to facilitating buying and selling of fresh fruit in Tulare county where contracts are made between producer and buyer, the Tulare County Farm Bureau has adopted a standard fruit buyers' contract of which are available at the farm bureau office at Visalia.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(© by Dodd, Mead & Company.)

Alexander the Great

A TWENTY-TWO-YEAR-OLD boy —undersized, red-headed, sickly —set out more than 2,240 years ago with the modest intention of conquering the world. And he did it.

The boy was Alexander, king of the little northern Greek state of Macedonia. He is known as Alexander the Great.

In spite of the brave resistance at Marathon and elsewhere the barbarous world-power of Persia, after conquering practically all of Asia, had again turned its hordes against Greece, sweeping the whole luckless country and well-nigh stamping out the last smoldering sparks of civilization. This outrage Alexander determined to avenge. His father, King Philip, had made himself practical master of Greece, and Alexander himself, coming to the throne at the age of twenty, had completed that subjugation. Then he set himself to the task of crushing Persia. The plan was laughable in its audacity. Alexander's army of invasion consisted of barely 34,000 men. The Persian emperor, Darius, could put into the field millions of soldiers.

Nevertheless, with his well-drilled 34,000 Alexander crossed the Hellespont in 334 B. C. and marched boldly into Persian territory.

From the first he thrust aside the mighty but ill-organized resistance of the Persian armies and, as he advanced, his name spread terror among his foes and made his progress easier. He arrived at the ancient city of Gordium. There he was shown a chariot, whose pole was fastened to its yoke by a curious and intricate knot. He was told that, according to prophecy, the man who could undo that knot should become lord of all Asia. Many had tried and failed. With one blow of his sword Alexander slashed the Gordian knot in two. The prophecy was considered fulfilled and he was hailed as the coming Asian ruler.

Meantime, Darius, with a host of 600,000 men, marched against the youthful conqueror. Alexander lured him into the narrow valley of Issus, and there, where there was no room for the huge Persian army to deploy, he fell upon and routed it.

Onward marched Alexander, conquering everywhere, seizing Syria and Egypt and pushing ahead toward the Persian capital. Darius, with another incredibly huge army, opposed him at Arbela, but the Persian host fled at Alexander's first charge. The conqueror continued on his triumphant way, capturing all Persia and pushing forward to India. After stubborn resistance from the native king, Porus, he subdued the whole land.

Persia, as in the time of Marathon, was a more or less barbarous country. Greece was still the stronghold of culture and education. Wherever Alexander's conquests went civilization and learning went also.

Alexander was for continuing his onward march after the conquest of India, but his wearied soldiers refused to go farther into the unknown. When, reluctantly, he turned back, envoys from nearly every country in the world met him, offering submission.

Now that, as master of the world, he could rest, the less worthy side of Alexander's nature cropped out. He declared that no mortal man could have achieved all that he had and that he must therefore be a god, the son of Jupiter. He went on to assert that as mankind must, after his death, worship him as a god they might as well begin at once. Callisthenes, one of his wisest counselors, opposed the plan, declaring it blasphemous. Alexander had him tortured and killed. As a lad Alexander had had three tutors. One had taught him to believe himself a deity. Another had disciplined him severely and had striven to teach him humility. The third (Aristotle) had imparted to him the love of learning. Having practiced the precepts of the second and third tutors and thereby winning the world, he now turned to the mad teachings of the first.

He declared himself a god and believed it. He tried to make his army acknowledge him as son of Jupiter. He took to drinking heavily, and in his cups would boast loudly of his own greatness. On one of these occasions he claimed credit not only for what he himself had done, but for heroic feats performed by others long before he was born. His dearest friend, Clitus, remonstrated with him for these lies, and Alexander, snatching a spear from a guard, ran him through. Sobered by his own terrible deed the unhappy monarch declared himself, with some truth, not fit to live and tried to starve himself to death.

Soon after he was found weeping violently. A courtier asked:

"Why should the divine conqueror of the world shed tears?"

"Because there are no more world's to conquer!" sobbed the king.

A three-day drunken orgy at Babylon in 323 B. C. threw him into a violent fever, and after a brief illness he died. He was barely thirty-two years old and had reigned but twelve years. In that time he had conquered everything except himself. The monarch of the world was the helpless slave of his own vanity and violent passions.

He died, and the world-empire he had built up was torn to pieces among his generals. But the civilization and learning that he fostered were destined to survive through all ages.

A NOTABLE FOURTH

The Fourth of July this year was a notable anniversary in several respects. It was the one hundred and fiftieth anniversary of the adoption of the Declaration of Independence; it was the one hundredth anniversary of the deaths of former Presidents Adams and Jefferson; it was the birthday of President Coolidge, who was born July 4, 1872.

Thomas Jefferson, who wrote the Declaration if Independence, and John Adams, who made the principal address in its behalf before the Continental Congress, both became presidents of the United States. That both of them died on July 4, 1826, exactly fifty years after its adoption, furnishes one of the most remarkable coincidences in history.

After the establishment of the government of the United States, Adams and Jefferson were political opponents. Adams was vice-president during Washington's two administrations, and succeeded Washington as president, but was defeated for re-election by Jefferson, who became the third president of the United States.

However antagonistic they may have been in politics, after their retirement from public life Adams and Jefferson were close friends and maintained a continuous correspondence for several years. These personal letters are among the most interesting documents of their day. Adams was 90 years of age at his death, while Jefferson was 83.

In view of the circumstances stated, July 4, 1926, had a peculiar significance which surely could not have failed to impress every patriotic and loyal American.

BALANCED EDUCATION

Eighty-two boys in the graduating class of the Jefferson high school in Portland earned $64,383.50 during their high school course, the average for the class of ninety-three being $692.50. One boy, Neil Bodye, earned $2,280. The girls earned an average of $71.05, with forty-eight girls collecting $8,454.60, and Alma Lorenz earned $500.

The nature of the jobs indicates that the present generation is not drifting too far into "white-collar" preference. Almost every industry, however hard or hand soiling, was represented.

Education should make a man better qualified for citizenship, for enjoyment, for trust, because of his better balance and his wider vision. It should not take from him the basic principles of faithfulness to his job, whatever it is.

AMERICAN TEAMWORK

The American people will be particularly interested in the following summary from the report of the British Labor Commission, and the discussion of industrial co-operation as the guarantee for future national prosperity, which is presented by Lewis E. Pierson, chairman of the board of the Irving Bank-Columbia Trust Company, in a recent address before the New England Bankers' Association.

After pointing out that it is a banker's duty to keep pace with the economic situation, exert his influence to stabilize business, and to direct attention to healthy and progressive forces which make for national prosperity, Mr. Pierson pointed out that for half a century we have been perfecting an industrial machine which today produces more manufactured products than any other nation in the world.

To secure this high production, we quickly learned that two factors were necessary. The first was power machinery, and the second was development of business units large enough to command the capital and set up an elaborate manufacturing plant.

"High production, high wages and high consumption are the cardinal principles of modern American industry.

"We look abroad, and we find the low production, low wage and low consumption nations with their factories idle and a large proportion of their people unemployed."

Mr. Pierson gives quotations from the individual statements of the members of the British Labor Commission which recently visited this country to study our industrial system with the idea of bettering the position of their own country and its people. In his conclusion, Mr. Pierson said:

"These visitors placed their fingers on two factors which, in their judgment, have been most largely responsible for our favored position. First, high production with its attendant corollaries of high wages and high standards of living; second, the co-operative spirit which exists between management and labor within American industry.

"We behold government devoting its resources and authority to the solution of industry's difficulties From the workman at his bench to the executive at his desk, the spirit of co-operation and team play invigorates our whole industrial movement. If we can keep clearly in our minds the tremendous distance which we have traveled in a few short years, and the success which on the whole has crowned our efforts, there will be little the demagogue or the charlatan can do to disturb the steady progress of the American nation. With management and nation working together to increase the productivity of American factories, with our industrial structure co-operating to perfect the processes of business, we can move steadily forward to even better things, toward a future which will be rich with deserved achievement"

HOME WORK SWINDLERS

Recently the Post Office Department issued a fraud order barring from the mails all matter addressed to or coming from several concerns which advertise for persons to address envelopes and mail circulars at home. A sample advertisement of one of these swindling concerns is as follows:

"Ladies wanting home work, any kind, spare time, write, inclose stamp. Eller Company, V-296, Broadway, New York."

Those who replied to such advertisements were usually required to pay certain sums, from 50 cents to $3, for "directories," "outfits," or some similar equipment, before starting to work. Then the conditions under which the work was to be done were found to be such that few made any further effort to engage in it.

The swindlers made their money from the small sums sent in for the "outfits," and from orders for worthless jewelry and the like. Hundreds of women in need of employment made sacrifices to send these small amounts, only to suffer disappointment through losing their money and failing to secure the remunerative work which they had been led to expect

It is hard to imagine a more contemptible or heartless swindling scheme than this, as it preys entirely upon the poor and unfortunate who can least afford to lose the money thus fraudulently secured from them.

Plymouth church, in Brooklyn, has had only four pastors since it was established in 1874—Henry Ward Beecher, Lyman Abbott, Newell D. Hillis and James S. Durkee.

EARLIEST KNOWN MAN

Recent discussions concerning the evolution of man has awakened an increased and growing interest in our early ancestors While the remains of several primitive specimens have been unearthed in comparatively recent years, the search for additional types is going forward in many parts of the world.

What is believed to be the oldest remains of a man-like being so far brought to light are those of the Java man, discovered in 1891. This creature was ape-like, but had greater brain capacity and was of more human development than any known ape. He is known to scientists as Pithecanthropus erectus, and lived about 500,000 years ago.

Next is the Heidelberg man, whose jaw was ape-like, but with truly human teeth, found in Germany in 1907 under 79 feet of sand, mingled with the remains of now extinct mammals of 250,000 or more years ago.

The third is the Piltdown man, found in Sussex, England, in 1912, which also combines characteristics of both ape and man. This specimen probably lived 150,000 years ago.

Next in order is the Neanderthal race, represented by numerous remains, including complete skeletons discovered in various parts of Europe and Asia since 1856. These were more ape-like than any race of men existing today, but were nevertheless fairly passable human beings, and lived about 50,000 and 100,000 years ago.

Finally, perhaps 50,000 or more years ago, there began to appear several races of true men, the Cro Magnon, Grimaldi, Aurignacian and Brunn races, of whom many well-preserved skeletons have been discovered during the last sixty years. The Cro Magnons were perhaps the finest physical specimens who ever lived, the men ranging from five feet ten and a half inches to six feet four and a half inches in height.

There are few subjects more fascinating than that of primitive man, and any serious-minded person will be well repaid for the time spent in studying it.

ROYAL ESTATES SAVED

Temporarily at least the lands, the palaces and the castles of the former kaiser and German princes have been saved from entire confiscation at the hands of the present government of the German republic, through the failure to secure sufficient popular votes for a bill providing such confiscation, in a referendum held on June 20. In order to pass the law it was necessary that 20,000,000 votes in its favor should be cast, while the count showed only approximately 14,889,000 for the measure. Only about 540,000 voted against the law, but this was not particularly significant, owing to the peculiar provision that an affirmative majority of all qualified voters was required, whether they voted or not.

The result of the referendum does not mean, however, that the former rulers are to retain their property intact. Many who did not vote for absolute confiscation are in favor of holding a large part of these lands and their appurtenances for the public use. The next step will be to arrange a compromise measure, whereby the state will retain a part of these properties.

Such a measure would undoubtedly be just. It seems unreasonable that the former rulers, whose folly brought about such a calamity upon the German people, should continue to fully enjoy the vast fortunes accumulated at the expense of their former subjects. As a manifesto of the Center party puts it, "the consequences of a lost war and impoverishment must be borne by the princes along with others."

GREATEST NEED OF FUTURE

Since 1882, general use of electricity has extended until it is the great dominating industrial fact in this country. Our own generation has seen this industry rise to its high ranking position, but the next generation will see an expansion of electric enterprise beyond anything in the past.

There is no longer any tangible opposition to public utilities under state and federal regulation, that protects consumers and investors.

The following statement appears in a discussion of this question by Frank L. Dame, president of the North American Company:

"The era of electricity is at hand, and with it comes the era of the large electric power company with its cheap and efficient production and distribution of current. Electricity has become inseparably connected with the life of the average American. The need for it extends throughout the whole course of domestic and industrial life. And more than that, new uses and new needs are constantly arising. It can be confidently predicted that the growth and expansion of sound electric light and power companies will exceed the development of general business for many years to come."

Telephone experts in Omaha have figured out that if a messenger boy was forced to handle all the telephone calls put through the local exchanges in a single day, he would have to make a trip equal to twenty-five times around the world.

EMOTIONAL LEGISLATION

Determined opposition to the enactment of compulsory automobile liability insurance legislation has been voiced by the American Automobile Association, representing 800 motor clubs and over a million motorists.

Percy V. Long, a prominent San Francisco attorney, classes such insurance as "a piece of experimental legislation of an emotional character."

The fundamental aim to be attained by such legislation is reduction of accidents. But will insurance that is forced upon a reckless driver tend to make him more careful when he knows that an insurance company or the state will be held responsible for the damage he does?

The insurance advisory committee of the United States Chamber of Commerce, after an exhaustive study of the situation, says that the final responsibility for reduction of accidents rests squarely upon the various communities which, with their police powers, are in a position to enforce regulatory measures

It is child's play to "pass the buck" for accidents on to insurance companies, whose business it to pay losses and not act as policemen. It seems still more foolish and uncalled for to launch the state into the automobile insurance business, on the theory that by writing cheap insurance at the expense of the taxpayer, automobile accidents and careless driving will be stopped.

Heavy fines and long term jail sentences will do more to check the reckless driver than anything else.

TAX REDUCTION

Income tax receipts for the second quarter have exceeded all expectations, and in spite of the recent slash in rates, indications are that total collections for the first half of 1926 will run well over the amount collected for the same period in 1925.

The old theory of "soaking the rich man" to raise taxes, has been pretty thoroughly knocked in the head. In fact, a tax policy that soaks either the rich man or the poor man, big industry or small industry, will dry up the sources of tax revenue—namely taxable property and productive enterprises.

Every city, county and state can profit by the object lesson furnished by the reductions in federal income taxes.

If the taxing authorities would devote their energies to finding ways and means to reduce taxes, instead of inventing new methods of taxation local business in every community would be greatly benefited. New developments with increasing taxable assets would furnish new sources from which to secure more tax revenue.

JACKSON'S BIRTHPLACE

The century-old controversy over Andrew Jackson's birthplace was revived in the House of Representatives recently, when Congressman Hammer of North Carolina told the members of that body that "Old Hickory" was a native of the "Tarheel" state, and not of South Carolina, as Jackson himself believed.

Mr. Hammer submitted historical data which proved his assertions—at least to his own satisfaction, and said: "Even President Jackson was mistaken when he said he was born in South Carolina."

On its face, this seems to be a rather bold assertion, in view of the fact that Jackson was among those present at the notable event, while Congressman Hammer was not.

MISS SHERLOCK HOLMES IN THE TELEPHONE SERVICE

A man who spoke no English appeared at the Salt Lake City passenger depot to demand telephone word with an address that nobody could Central took the name that was all understand. The chief operator at but unintelligible, though it sounded like "Hinsissel," as he pronounced it, and finally located at Eureka, seventy miles away, a subscriber with a name that might be imagined to be what the caller gave. A request to this Eureka man to answer, and if possible, assist the caller to be understood, disclosed that the caller was the Eureka man's nephew, just over from Norway, and stranded in Salt Lake City through some ticket mistake or loss.

They learn how to serve in the telephone company, as it emphasizes courtesy and services for its patrons.

Bankers are not required to be particularly musical, but they must at least know their notes.

Cupid's dart sometimes performs like a booomerang.

LIBERTY BANK

A dividend of 4% per annum has been declared on savings deposits, for the six months period ending June 30, 1926, said dividend being payable on or after July 1, 1926. Dividends not called for will be added to the account and will earn interest from July 1, 1926.

SAVINGS DEPOSITS MADE TO AND INCLUDING JULY 10, WILL EARN INTEREST FROM JULY 1.

R. E. MILLER,
President.

MORE EFFICIENT HOMES

Baltimore has constructed an entire community of more than 100 houses where no coal, ash or garbage man need go.

The houses are heated by gas, cooking and heating of water are done by gas; electricity furnishes lighting and power for many other domestic purposes; incineration of garbage and rubbish is taken care of by gas.

These houses are especially co structed to embody these facilitie and with the view of conserving eve heat unit through the scientific i sulation of the houses themselves.

Twenty-six of the larger cities a going to build thirty-six such mo homes during the summer.

Colma News Notes

SYLVIA HAUBRICH FISCHER

The Benassini family are enjoying ir vacation at Fairfax this month.

If you expect to vote, register now h A. Stampanoni, San Pedro ave-e.

Mr. Martini, who was shot in an counter with bandits recently, is overing nicely.

Miss Rosa Bauer, of Price street, ended the Orpheum last Thursday ening with friends.

Miss Thelma Selmi returned home m Calistoga, where she spent the st week with relatives.

Miss Annette Lucey and a party of ends spent the holidays at Casa Del y Hotel in Santa Cruz.

A number of the members of the ddies Socal Club spent the Fourth July holidays at Capitola by the a.

Mrs. B. W. Haubrich, Bennie ubrich and Mrs. Stephen Fischer vacationing at Capitola by the a.

Misses Florence McKendrick and atherine McKendrick, accompanied relatives, spent the Fourth of July Santa Cruz.

Mr. and Mrs. Harry Lambert, of wndale, visited in Marin county nday at Laurel Nook, the home of e J. L. Brown family at Ross.

Mr. and Mrs. Frank Beffa and ildren, Frances and Vivian Beffa, Tracy, spent last week end with rs Annie B. Bauer, of Price street.

Mr. and Mrs. Edward Bauer, Miss mily Bauer and Mrs. Robert Heer-ga left Monday by motor for Holly-od and Yosemite. They expect to away for a month.

Mrs. A. Gowland and Miss Daisy owland, who are spending their cation at Sycamore Grove, in the nta Cruz mountains, will return me the end of this week.

The Franzoia family are spending their vacation with relatives at Niles.

Mr. and Mrs. G. Belli are building a beautiful new home on First avenue.

Mr. and Mrs. John Hume spent the Fourth of July holidays at Clear Lake.

Mr. and Mrs. Joseph Merlo motored to Salinas last Sunday to visit relatives there.

Miss Irene Schenone spent several days of this week with her aunt in Burlingame.

Harold Varni motored to Stockton and visited relatives over the Fourth of July holiday.

Mr. and Mrs. Joseph Altieri and son Joseph are vacationing in the Yosemite valley.

Miss Elsie Fahey spent last week end at the Fahey summer home in Fairfax, Marin county.

Mr. and Mrs. Matthew Grady and daughter Margaret spent the Fourth of July in Santa Cruz.

Mr. Starke is enjoying two weeks vacation from his duties in the M. Belli Hardware Store.

G. Casentini has opened a first class grocery store in the new Aratta building on Mission street.

Mrs. Ernest Barsi and son Nello, of Vale street, are vacationing in Sonoma county with Mrs. Peter Barsi.

Mrs. Urbano Granucci and children left Thursday for Calistoga, where they will spend their vacation.

Mrs. Bert Sturla and daughter Alberta are spending a six weeks vacation with friends in Salt Lake City.

Misses Inez and Rose Merlo, of San Pedro avenue, are spending their vacation with their aunt in Salinas.

Mr. and Mrs. Louis Merlo, Miss Delucchi and Romeo Lagomarsino spent the Fourth of July in Stockton.

Mrs. Benassini and children returned home from Fairfax last Tuesday evening, having spent their vacation there.

Mrs. Pauline Parmisano and daughter Geraldine, of Crocker Tract, visited Mrs. Pete Benassini last Thursday.

Mr. and Mrs. F. Salgenti and children, Edith and Eleanor, of Oakland, visited Mr. and Mrs. Fernando last Sunday.

George Krehl, Mr. and Mrs. Jack Callan and children, Jack and Robert, Miss Gladys Callan, Miss Louise Silicani, Mr. and Mrs. Bert Silicani and children and other friends spent last week end at Allendale, near Winter Springs, having a most enjoyable holiday.

Misses Louise Segale and Florence McKendrick entertained the members of La Fiesta Social Club at the home of Miss McKendrick in Daly City last Friday evening. Following the business of the evening a delicious supper was served. Piano and vocal solos were enjoyed until a late hour. Among those present were Lorraine Wall, Margie O'Connor, Sylvia Fischer, Louise Segale, Margaret Varni, Tessie O'Connor, Florence McKendrick, Laura Figone, Elsie Fahey, Christine Hume, Esther Forsell and Julia Sampson.

Miss Annie Botteo has opened a beauty partlor on San Pedro avenue.

Mrs. L. Botteo, of San Pedro avenue, spent last Wednesday in San Francisco.

Mrs. Edward Cuneo, of San Francisco, visited her mother, Mrs. Selmi, last Thursday.

Miss Annie Botteo returned home Tuesday from Guerneyville, on the Russian river, where she spent the previous week.

Mrs. Beatrice Batz will leave Sunday for a two weeks vacation to be spent in Los Angeles and other points in the southern part of the state.

Mr. and Mrs. Al Zanetti, Mr. and Mrs. Louis Sani and children, Eleanor and Lillian, and Mr. and Mrs. E. Sani spent last Sunday at Salada Beach.

Miss Libera Boetto, eldest daughter of Mr. and Mrs. L. Boetto, became the bride of Mr. Mitchell Farmer, in Holy Angels church, on Tuesday morning, June 29. The ceremony was performed by the Rev. Father Schenone. Miss Annie Boetto was the bridesmaid and Mr. Alfred Bandittini was the best man. The bridge was gowned in a blue traveling gown and the bridesmaid in brown. Both wore corsage bouquets. A wedding breakfast was served at the home of the groom's mother, Mrs. Rodenburger, of Crocker Tract. The relatives of the young couple were present. Mr. and Mrs. Farmer went on a motor trip through the northern part of the state and are now residing in the Crocker Tract.

RESTORATION OF RACING

The Argonaut, San Francisco, one of the oldest, most influential and conservative of Pacific Coast publications, comes out emphatically in the issue of June 26 for restoration of racing in California under the provisions of the initiative measure known as the "Breeders' Bill." Extracts from the Argonaut's editorial follow:

"A revival of horse racing under auspices that promise to keep the sport reputable and permanent is being promoted in California. A revival of the industry would be of considerable economic value.

"The old conditions led to such a system of corruption and scandal that betting had to be made illegal. Numbers of the great horsebreeding establishments removed elsewhere or sold out their stock. Many of the wealthier and more enthusiastic owners retained their stock farms and headquarters in this state.

"It is beyond doubt that the sentiments of the public are in favor of the proposed revival of racing here, and this fact is evidenced by the success of the canvassers seeking signatures to the proposed measure.

"The present movement is sponsored by men concerning whose integrity and standing there can be no question. In their hands the revivial of horse racing and a new impetus to horse-breeding in California can be assured.

"But if any suspicion of such influences as have made Tijuana a by-word in the community is to be permitted to influence the voting, such success may not be so certain.

"With a responsible racing board in control of all racing activities within the state, and with the members of the board selected by the governor and always subject to popular criticism, and with the book-making and pool-selling elements absolutely eliminated, such a contingency (as the debacle that befell the turf in 1909) should never occur again.

"It is reasonably to be expected that the proposed measure will be enacted and that California will quickly resume its former proud position as the cradle of record-breaking thoroughbreds."

WIDER ROADS A NECESSITY

Paved roads used to be our chief concern in a good roads program. It is estimated that this year we will have in excess of 500,000 miles of hard-surfaced roads in the United States. These improved roads have brought an increase in traffic which no one even dreamed of ten years ago. The problems we now face is not only paved roads, but "wider" roads.

Wider roads are necessary for two reasons: To enable traffic to speed up, and to prevent accidents. On many of our crowded narrow roads a slow moving truck or other vehicle will block traffic, due to the fact that there is little opportunity to pass such obstructions from the rear.

Many states have already started to remedy this situation, and on the Pacific Coast two-foot shoulders are being built on each side of the road and a few inches higher than the old surface. These shoulders are made of either asphaltic concrete or cement, and the space between them is resurfaced with asphaltic concrete.

By this method, narrow pavements are satisfactorily widened and thickened at a minimum expense. From now on, road widening will be as important as road paving.

The tendency is to make all the new roads with less crown.

CONSTRUCTIVE JOURNALISM

No feature of newspaper work is recognized as more important than the constructive force of journalism in promoting good will and co-operation among all classe and all sections of the country. Harmony and prosperity and our financial and industrial welfare depend upon the understanding of one class or section by another.

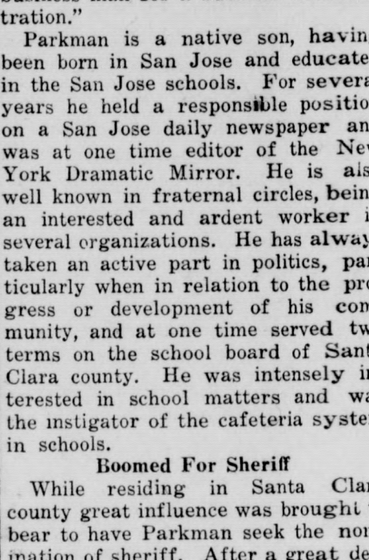
It is a well established fact of history that newspapers have enormous latent constructive or destructive powers—they can make a war or spoil a peace.

Their influence in either direction is tremendous—possibly greater than many editors are willing to admit.

Newspapers are an institution of democracy, but their power and influence can be no greater than the thought prompting and supporting their editorial policy.

CANDIDATE

Harry L. Parkman, well known San Mateo man, has formally announced that he will be a candidate for the Republican nomination for assemblyman.



"BUSINESS MAN FOR BUSINESS ADMINISTRATION"

Harry L. Parkman has announced formally that he will be a candidate for the office of assemblyman from the Forty-second district of California comprising San Mateo county. Parkman will seek the Republican nomination at the primary election to be held on August 31, and declares that he will conduct his campaign on his reputation and on the platform of "a business man for a business administration."

Parkman is a native son, having been born in San Jose and educated in the San Jose schools. For several years he held a responsible position on a San Jose daily newspaper and was at one time editor of the New York Dramatic Mirror. He is also well known in fraternal circles, being an interested and ardent worker in several organizations. He has always taken an active part in politics, particularly when in relation to the progress or development of his community, and at one time served two terms on the school board of Santa Clara county. He was intensely interested in school matters and was the instigator of the cafeteria system in schools.

Boomed For Sheriff

While residing in Santa Clara county great influence was brought to bear to have Parkman seek the nomination of sheriff. After a great deal of persuasion he finally got his friends to desist in their efforts, his reason being his contemplated removal from the county.

Previous to coming to San Mateo, Parkman resided in Sunnyvale, where he worked actively for the best interests of his municipality. He had an orchard home, but his business interests were in San Francisco and he decided to locate where so much time would not be required for commuting. San Mateo impressed him as a city of beautiful homes and splendid schools. Some years ago he purchased a home in Glazenwood and moved his family there. His daughter is now a student in the high school, having been graduated from the Homestead school.

Well Known Here

Parkman is no stranger to local business men or to the community. For the past twenty years he has had business dealings with Peninsula merchants, who regard him as a wide awake, thoroughly progressive business man, whose industry and enterprise entitles him to the success he enjoyss.

In financial circles he is well known and highly esteemed. He was at one time vice-president of the Republic Rubber Company of California, a thirty million dollar corporation. He was general manager of this thriving concern when he resigned a few years ago to go in business for himself. He is now owner of the Empire Supply Company of San Francisco. Being endowed with much business ability, his company has forged ahead and is now most prosperous and flourishing.

States Policy

"In seeking this important office of assemblyman," declared Mr. Parkman, "I want the voters to understand that I have the best interests of the Peninsula and the state of California at heart and that I can be depended upon to support any project concerning the welfare of the community.

"I believe I have the sound business training and good judgment necessary to properly qualify for a seat in the state legislature and will ever work towards improvement of the Peninsula along lines of material and intellectual municipal growth." —Adv.

TAKE FACTORY TO FARM

In a discussion of the farmer's problems before a recent electrical convention, Chairman Guy E. Tripp of the Westinghouse Company pointed out anew the trend of manufacturing concerns toward the smaller communities.

He declared that the centralization of industry has gone too far, and that the reaction which is now beginning to be felt is only the logical result of the congested conditions in the larger centers. He believes that considerable economies for both industry and wage earner can be secured by establishing relatively small unit plants in the small towns of the rural districts, thereby making available part time labor of many farmers, who will thereby be enabled to add to their incomes.

Besides this, such an arrangement would bring about a more widespread use of electricity on the farm, because the service connections made to nearby factories could be easily and economically extended to farms in the vicinity, relieving the farm family from much of its present drudgery.

Mr. Tripp quoted with approval Henry Ford's statement that in the future "the country will be traversed by chains of small towns clustering around individual factories and inhabited by people who will divide their time between the factory and the farm."

Such a condition would doubtless prove most helpful in solving the farmer's problems of surplus crops by giving him another outlet for his energies, instead of forcing him to continue the maximum raising of products which often must be dumped upon an already glutted market.

FAVORS RACING MEASURE

M. T. Grattan, Past Commander of Underwood Post No. 122, G. A. R., writing to the racing board campaign committee, says:

"The racing legislation proposed by you for California is admirable. It not only will aid veterans and agriculture, but put the finest and most wholesome of outdoor sports upon a legitimate and correct basis. I most heartily wish you success."

The Rainy Day Club was organized by women thirty years ago to agitate for shorter skirts. Few movements have met with more marked success.

Amp's Advice to Autoists

"IF you allow dirt to collect on top of your battery, you're courting trouble. Let us tell you why. The 5-Point Service he gives includes keeping the battery top clean and free from electrical leakage. Battery holds charge better—lasts longer."

Three-Tube Receiver, Square Wound Frequency and Detector. Can

By CARLTON E. BUTLER

(Member American Institute of Electrical Engineers and Institute of Radio Engineers.)

Styles in radio receivers have changed with the changing conditions of the broadcasting field. A three-tube regenerative set with two stages of radio frequency amplification was capable of giving satisfactory reception a few years ago, but today, with the worst congestion of the ether lanes ever experienced in the history of radio, and the increasing use of high-power broadcasting stations, selectivity requirements demand the use of radio-frequency amplifying circuits.

A three-tube circuit today should use some form of tuned radio-frequency amplification that successfully copes with 1926 conditions and furnishes an inexpensive set that later on may be enlarged into a five-tube receiver by the addition of two stages of audio-frequency amplification.

Leave Room on Panel.

In the diagram shown here, however, just the three-tube circuit is illustrated as it makes a complete set in itself. Room should be left on the panel and in the cabinet for the other stages at a later date. For this reason a 24 or 26-inch panel should be used, with a cabinet and baseboard large enough to allow for this future expansion. The three-tube set will bring in just as much distance and possess all of the desirable qualities of the high-priced five-tube sets on the market, excepting volume, which is obtained when audio amplification is added.

Little apparatus is needed to construct this set, and with reasonable care an excellent receiver can be had for very little outlay of time and money. To construct the set you will need the following list of apparatus:

1 square wound toroid coil, type T1.

2 square wound toroid coils, type T2, indicated as T2 and T3.

3 straight-line frequency variable condensers, .00035 mfd. capacity. Indicated as C1, C2, and C3.

present circuit.

Two antenna terminals are provided on the first toroid coil. These are to adapt the set to a long or short antenna. It might be well to bring these two terminals out to binding posts on the rear of the cabinet so that the antenna can be quickly changed over from one to the other as conditions require more selective tuning, or greater volume is desired.

The position of the apparatus in laying out the receiver baseboard is not critical. The coils may be placed side by side without intercoupling or causing the receiver to become unstable, due to their confined magnetic fields.

AMERICAN TEAMWORK

The American people will be particularly interested in the following summary from the report of the British Labor Commission, and the discussion of industrial co-operation as the guarantee for future national prosperity, which is presented by Lewis E. Pierson, chairman of the board of the Irving Bank-Columbia Trust Company, in a recent address before the New England Bankers' Association.

After pointing out that it is a banker's duty to keep pace with the economic situation, exert his influence to stabilize business, and to direct attention to healthy and progressive forces which make for national prosperity, Mr. Pierson pointed out that for half a century we have been perfecting an industrial machine which today produces more manufactured products than any other nation in the world.

To secure this high production, we quickly learned that two factors were necessary. The first was power machinery, and the second was development of business units large enough to command the capital and set up an elaborate manufacturing plant.

"High production, high wages and high consumption are the cardinal principles of modern American industry.

"We look abroad, and we find the low production, low wage and low consumption nations with their factories idle and a large proportion of their people unemployed."

Mr. Pierson gives quotations from the individual statements of the mem- British Labor Commission

How to Avoid Burning Out Your Radio Tubes

"An ounce of prevention is worth a pound of cure," applies nowhere more forcefully than in the burning out of radio tubes. A simple measure to eliminate, as far as practicable one of the wastes of radio is proposed by the manager of a prominent radio manufacturing company. An ordinary 40-watt lamp is all that is needed to conduct the operation, resulting often in saving of time and money, and at other times "making assurance doubly sure."

"Did you ever hear the story, 'I've burned out five tubes?'" Mr. Manager asked in discussing the matter with a group of dealers. "Now there is no occasion for this happening. It, of course, may be possible because of an internal short in one of the tubes between the grid or plate and the filament; or possibly through carelessness in installing the receiver and connecting the battery wires.

"The wise dealer, however, or the one installing the set, always connects up every receiver and uses an ordinary 40-watt, 110-volt lamp, for instance the kind you ordinarily have in the store or find in the home, in series with the plus 90 'B' battery lead when the receiver is installed for the first time.

"With this precaution, it is impossible to burn out tubes, for even if there is a defect of any kind in either the receiver or connections, the tube filaments will only glow or light up very dimly with the 40-watt lamp connected in the plus 90 'B' battery leads, and then only when the filament control switch is still on its 'off' position.

"If the tubes do light with the switch in the 'off' position, it is a direct indication of trouble, and the receiver should be immediately disconnected and the fault found and eliminated.

"Always use that 'safety valve' 40-watt lamp in series with "B" battery for it assures absolute protection to the tubes. When the set is completely hooked up and working properly, you can safely remove the lamp and still know that the set will function properly, and that there will be no possible chance of burning out tubes under normal operating conditions."

Battery Charging Rate

A storage battery will not have a long life if it is charged at a rate greater than six amperes, and in the case of small batteries three amperes is enough.

Amount of Power That Your Aerial Picks Up

It has been computed that the amount of power picked up by the ordinary receiving aerial is about one-billionth of a fly-power. Think of it! If your receiver picked up as much power as that possessed by a fly, you would be receiving a billion times more energy than you are now receiving. It seems almost impossible to comprehend this fact. Here is another illustration that may help you to understand how very small is the power actually picked up by your antenna. If the power radiated by the average transmitting station were collected and used to heat an ordinary electric toaster it would not even glow at a dull red heat and certainly would not burn your bread. Yet this small amount of energy is radiating in all directions and spreads over a circle with a diameter of 16,000 to 20,000 miles, for signals have been picked up hundreds of times at points 8,000 to 10,000 miles distant from the transmitting station.

Just imagine every foot of space in in a circle with a radius of 10,000 miles being flooded with part of the energy that originally was only enough to heat an electric toaster, then you begin to get an idea of the extremely small amount of energy that reaches your particular aerial.

From this it will be realized that to detect the extremely faint signals from distant stations your receiver must be very sensitive and efficient.

Uncle Sam's Radio Job Has Grown Since 1911

Uncle Sam's job of supervising all the radio broadcasting outfits of the country has grown rapidly since 1911 when this service began. In that year there were but two men enforcing the radio laws. Today there are 19 in the headquarters office in Washington and 70 in the field watching over the 18,103 licensed amateur and commercial stations in this country and on United States ships. It is estimated that 25,000,000 people have access to radio equipment with which to receive broadcast programs.

Value of Colored Wires

Colored battery connections are good vacuum tube insurance. Obtain wire in several different colors or dip the ends in dye. When taking the wires off the set merely note the position of the various colors and when reconnecting place them the same.

Health Problems No Longer Matters of Sectional View

By DR. JOHN POMEROY, California Health Officer.

THE one big outstanding fact of the United States today is that "everybody is our neighbor." I mean that literally. No longer can we successfully put up state bars or county bars, or even community bars, to keep out illness or infection. With the coming of the motor, the completion of transcontinental and north and south highways, the old isolation is gone forever, and this means that we must have greater standardization of health laws—more uniform safeguards. New Yorkers play in California's "backyard," and the neighbor's children from Minnesota select Florida playmates, so to speak.

Even a moment's reflection serves to convince us of this. The impossibility of quarantining against any disease, when thousands of tourists of necessity begin a week on one side and finish it on the other—when an average family may meet at breakfast on Monday morning in Michigan and go in bathing on Saturday afternoon at the southern tip of Florida, is self-evident.

So, since distance is annihilated, and with it the old-time safeguard of segregation in infection, there must be a standardization of health work, a tremendous increase in the county and city health departments. It used to be that the country was conceded to present higher standards of health than the city, but this time has passed. Sources of water supply in the country have been infected by city dumping, indifferent tourists have contaminated the landscape, and the country people themselves, who go-a-touring quite as frequently as their city cousins, have brought back the possibility of disease.

American Citizenship Entrusted With Sacred Duty Toward the Dead

By HANFORD MAC NIDER, Assistant Secretary of War.

The so-called Reds are in reality not dangerous. They are usually foreigners who do not understand or appreciate America. They can be cured by education, experience, information. The real danger is not in the foreign Red, but the native yellow. These native yellows are the defeatists of our national life.

What they need more than anything else is a good course in American history, properly administered—the kind of history that was written at Belleau, Vaux, Soissons, St. Mihiel, Mont Blanc and the Argonne.

In the Belleau wood stands with us a great shadowy legion—the men of the Second division who did not come back—four thousand American boys. Whenever we of the Second gather together, unseen, unheard, they gather with us. All through life they will march beside you. Your citizenship must count double. They died that you and your children might enjoy American citizenship.

We who have seen American citizenship exemplified under every adversity know what its worth can be. We shall be unworthy of our trust if we do not teach that conception of citizenship to our sons and if we do not insist that that which we shall leave them shall be kept inviolate.

Duty of Modern Teachers to Make War on Materialism and Cynicism

By REV. ROBERT NELSON SPENCER, Kansas City.

Cynicism makes its appearance in children very early these days. I don't know where they get it, but young children sometimes think we are dancing down the road of life like butterflies. "I don't know where I'm going, but I'm on my way," aptly expresses a prevalent attitude.

Teachers are faced with a smug satisfaction in prosperity. Too many believe it is easy to get on, therefore they will get on.

From our higher institutions of learning comes the cry that many young men and women look upon the institutions as fashionable clubs where they may while away a few years happily and earn a reputation of having been educated.

Modern teachers must "be true to the heavenly vision," having in mind Paul's plea before Agrippa.

A vision is not a dream. A dream comes when one is not entirely awake nor entirely asleep. A vision is born of the complete consciousness; it comes when we are awake, when our energies are at the superlative of attention. I beg you not only to impart knowledge, but to inspire. Teach the vision of the higher education, of the clean and decent life.

Danger of Food Famines in Reduction of Farm Population

By FRANK O. LOWDEN, Ex-Governor of Illinois.

The American farmers' combined capital has shrunk $5,000,000,000 in five years.

There is grave danger of repeated food famines in the future unless steps are now taken to make agriculture more scientific and productive.

The year 1924 was a better year for the farmer than any of the preceding four years. Yet, after a wage allowance of less than common labor receives in other industries, his net return upon capital was 3.6 per cent, without deduction for depreciation of machinery or depletion of the soil.

It is clear that the great agricultural plant of America has been running down at a dangerous pace. Of course, this affects the farmer, but it involves the very life of the nation as well. If the farmer does not receive an adequate price he cannot go on producing indefinitely.

The farm population was reduced by almost half a million during the last year. This trend cannot go on long until there is a shortage of food.

"Misfit Children" Direct Contradiction of Great Scheme of Nature

By WILLIAM McANDREW, Superintendent Chicago Schools.

There are no misfit children. There are misfit courses, misfit textbooks, misfit methods, but in the nature of things no misfit children. As well say a man does not fit his clothes rather than that his clothes do not fit him.

Repetition of grades is too expensive a proposition to be required on the old unproved theory of withholding reward. It is expensive in money and to the children. In nothing you do is there more need of intelligent judgment than in the assignment of pupils at the close of the term. The essential thing is to put children where they will profit best.

THE AMERICAN LEGION

(Copy for This Department Supplied by the American Legion News Service.)

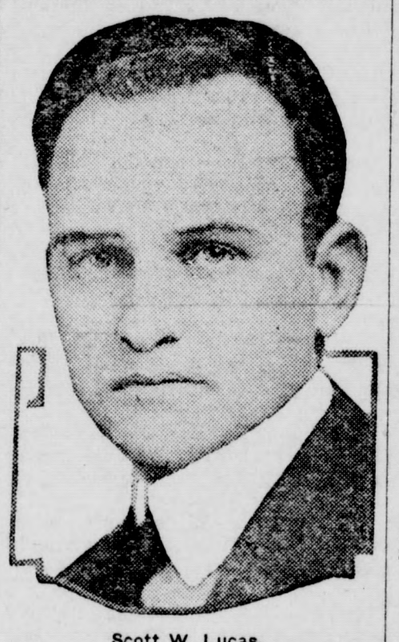
LEADS DEPARTMENT IN RECORD DRIVE

The ability to receive and execute orders is the first requisite of a good soldier in war or peace. That is why Scott W. Lucas of Havana, Ill., department commander of the American Legion, heads the largest Legion department in point of membership in the nation to surpass its 1925 membership enrollment.

When National Commander John R. McQuigg was elected the Legion's leader at Omaha for the year 1925-26 he commanded his department leaders to "go back to your departments and enroll the largest membership the Legion has ever known."

Scott Lucas obeyed that command to the letter. Under his leadership, although Illinois is among the "Big Three" of Legion departments, including New York, Illinois and Pennsylvania, the 1925 membership mark of the department was exceeded by May 1, 1926, with approximately 50,000 members enrolled.

A congratulatory telegram for this achievement was sent to Illinois de-



Scott W. Lucas.

partment headquarters by National Adjt. James F. Barton. The telegram follows:

"Heartiest congratulations to the Illinois department on exceeding its 1925 membership and in leading the entire nation in total membership on May 1. The national organization is deeply grateful to your department officers and to every post that has worked so hard, so faithfully and so splendidly to make this achievement possible. Your record is an inspiration to us all. More power to you."

The "model" membership campaign for posts was conducted this year by Roosevelt-Aurora post of the Legion at Aurora. So successful was this campaign that it was taken as the "model" to be followed by other posts of the nation and a booklet describing it was prepared by national headquarters and was sent to posts throughout the nation.

Mr. Lucas has been a hard-working Legionnaire since the inception of the organization. He organized the first American Legion post at Havana in 1919. He attended the organization caucus at St. Louis, Mo., and has attended every state convention. He is a lawyer by profession and resigned the position as state's attorney to become department commander of the Legion in Illinois.

May Take Whole Family to Paris Convention

Fathers whose sons are members of the American Legion and fathers whose sons died in the service of their country during the World war will be able to join the American Legion pilgrimage to France next year at the special reduced rates provided Legionnaires and members of the American Legion auxiliary, according to Bowman Elder of Indianapolis, chairman of the Legion's France convention committee.

The inclusion of the fathers makes it possible for a veteran to take his entire family to France with him as members of the regular Legion tour, since wives and mothers are eligible to membership in the trip by virtue of their membership in the American Legion auxiliary.

Gets Legion Medal

Bestowal of the American Legion Auxiliary Distinguished Service medal upon Mrs. George R. Crosfield of London, England, marked the visit of the distinguished British woman to America recently with her husband, Colonel Crosfield, who is president of Fidac, interallied veterans' federation of 10,000,000 members.

Mrs. Calvin Coolidge is the only other woman who holds the Auxiliary Distinguished Service medal. The auxiliary honored Mrs. Crosfield "in appreciation of her welfare work among American soldiers in England and France and as a leader in humanitarian work among the poor and disabled in her home land."

COULD NOT PUT ON HER SHOES

Mrs. Daugherty Was so Weak

In a little town of the middle We was a discouraged woman. For fo months she had be in such poor heal that she could n stoop to put on h own shoes. Unab to do her wor unable to go out doors or enjoy friendly chat wi her neighbors, l seemed dark ind to Mrs. Daughert

Then one day booklet was left her front door. Idly she turned t pages. Soon she was reading wi quickened interest. The little book was filled with letters from women conditions similar to hers who h found better health by taking Lydia Pinkham's Vegetable Compound.

"I began taking the Vegetable Co pound," Mrs. Daugherty writes, "a after I took the third bottle, I found r lief. I am on my eleventh bottle an I don't have that trouble any mo and feel like a different woman. recommend the Vegetable Compound everyone I see who has trouble lik mine, and you can use these facts a a testimonial. I am willing to answ any letters from women asking abo the Vegetable Compound."—Mrs. E DAUGHERTY, 1308 Orchard Ave., Mus tine, Iowa.

PRETTY HATS FOR MIDSUMMER; SIMPLICITY IN JUNIOR STYLES

LIKE the robins, early spring hats came in, singing a song of promise. Everything about these early hats hinted toward the coming of beautiful and softly feminine headwear for summer—after a long millinery winter in which hats were more or less mannish, monotonously similar and therefore uninteresting. But now is the winter of our discontent made glorious summer by hats that more than fulfill spring's cheerful promises. Wide brims—like fish stories—grow wider the summer advances—and even now the cartoonists find them means for poking fun at the eternal feminine. Here is a group of representative hats for midsummer revealing the the mode has been traveling in the direction of greater elaboration in styles for women. Therefore specialists, who devote themselves to the needs of children and young people, have practiced much restraint in the wraps and frocks they have created this season.

In frocks for juniors the two-piece styles lead with the jumper dress at the forefront. This is developed in all sorts of materials with wool and tub silks the favorites. Even one-piece dresses simulate the two-piece modes and in all of them neat effects are striven for, in their decorative features. This brings out tucks or plaits, and the use of pearl buttons

Group of Midsummer Hats.

and pearl buckles. Neck treatments make opportunity for diversity with sailor collars, notched collars and converitable collars contributing variety, and ties have become important. Just now those of dotted silk are popular, but there are endless patterns in gay colors to enliven daytime and sports frocks. Sometimes a contrasting vestee is worn with the jumper frock and this casual style is made up in the new, washable, brocaded silks for dressy wear. For smaller girls very simple one-piece dresses, in whatever fabric is chosen, are shown in all the different types. Voile in fine quality

Two Junior Models.

acefulness of shapes and the beaul craftsmanship that distinguishes e season. It is too bad that the otographs cannot reproduce the lor harmonies. The group leads off th a large hat of black hair braid ged with velvet and having a collar d long ties of velvet pulled through o very fine and brilliant rhinestone ckles. There is nothing more disguished in the world of millinery an these large, airy black hats, with inkling, diamondlike ornaments and is model deserves to be called a mmer night's dream. Just below it, the right, there is a large hat of nk visca with a collar of pink ribn arranged in ingenious folds about e crown. It has two flanges at the im edge, one of georgette and one silk. The big and gorgeous rose sed at the right side is an airy air of hemstitched crepe.

At the left a cool-looking sailor hat made of gray bengaline trimmed th gray velvet (embroidered in silr) around the base of the crown and sparkling pin at the front. It is as ol looking as the chic white hat bew it made with a soft brim of benline ribbon and a crown of handinted, padded embroidery. A lovely ay visca finishes the group as sene as a delicate Quaker lady. It is immed with wide bengaline ribbon match, arranged in fan-shaped ats at the front to make a suitable ckground for the handsomest of inestone ornaments.

Styles for children and the young girls, take their cue this sean, as usual, from those created r grownups; but they follow them more distance. For simplicity is ssntial in styles for the young, while and pastel colors, or white, is prominent in the displays of dressy frocks. Very few trimming devices are used on these, but often two colors in the voile are combined in one dress, or there is a little simple needlework by way of decoration.

In wraps for the younger girls the same simplicity prevails. Novelty cloths in bright colors, flannel and kasha play important roles in the mode. The cape shown in the picture is made of kasha in a soft yellow shade and the coat, as simple as possible, is in the color called "coral sand." It has a detached scarf in the same color embroidered at the ends.

"By day its voice is low and still—
A charming, dancing little rill;
But when the silent night is here
Its voice is heard so loud and clear
And yet so sweet it often seems,
As though the brook brought pleasant dreams."

GOOD MILK AND CREAM DISHES

A tablespoonful or two of sour cream will add a flavor to a salad dressing which will take it out of the ordinary class of dressings.

Cabbage shredded very fine and dressed with sour or sweet cream, sugar, a dash of vinegar if the cream is sweet, is another most tasty dish well liked by many men who refuse salads otherwise. A half cupful more or less of sour cream added to a cake mixture gives a most delightful flavor and texture and the cake will not dry out as quickly as the ordinary cake mixture will. The custom of making frozen dishes, using sour milk or buttermilk with fruit juices, is one to be commended. The mixture is less rich than creams and more cooling for hot weather desserts.

Raspberry Sherbet.—Take one cupful of sugar, and one cupful of raspberry juice, a tablespoonful or two of lemon juice and three cupfuls of buttermilk. Freeze as usual. Fruits, mashed and put through a sieve such as fresh peaches, apricots, adding lemon juice, sugar and buttermilk or plain sour milk in proportion, makes a variety from which to choose in frozen fruit dishes.

Grape Bavarian.—Mix one and one-half tablespoonfuls of gelatin with two tablespoonfuls of water and one-half cupful of grape juice. Dissolve one-half cupful of sugar in one cupful of boiling water, pour into the gelatin mixture. Add three tablespoonfuls of lemon juice, cool and when slightly thickened, fold in one cupful of sour cream whipped. Set away to mold.

Cornmeal Cooked in Milk.—Scald four cupfuls of milk and add gradually three-fourths of a cupful of cornmeal, one and one-half teaspoonfuls of salt, stirring until well mixed. Cover and cook in a double boiler for two hours. Serve as a dessert with cream or with milk as a full meal.

Grated horseradish mixed with whipped cream, salt, sugar and a few dashes of cayenne is a good sauce to serve with fish.

Popular Foods.

Now is the time for all good housekeepers to serve the wild mushroom. It will be found in woods and pastures and when served with cream on toast makes a dish of rare flavor. Broiled mushrooms are delicious. Place the caps on a buttered broiler and cook well on the top, turn and cook on the other side; in each cap place a lump of butter and serve on toast, or as a garnish for broiled steak.

Deviled Mushrooms.—Mix a teaspoonful of mustard, a dash of cayenne, a teaspoonful of worcestershire sauce and half a teaspoonful of paprika, cover broiled mushrooms with this mixture and serve on hot buttered toast.

Grape Mold.—Take four tablespoonfuls of granulated gelatin, soften with two tablespoonfuls of cold water, then add the juice and grated rind of a lemon, two and one-half cupfuls of grape juice and one-half cupful of sugar. Stir until well dissolved and the gelatin has begun to thicken, then add one-half pound of grapes seeded and skins removed. Pour into a wet mold and set away on ice to harden.

Date, Nut and Pineapple Salad.—Chop a cupful of dates and three good-sized apples, add a cupful of chopped celery and a cupful of broken nut meats, one-half pound of seeded and skinned grapes. Mix all together and heap on a slice of pineapple which has been marinated in French dressing. Serve with mayonnaise dressing. Marshmallows may be used in place of nuts if cut fine.

Peach d' Armour.—Fill tall glasses with peach ice cream and sufficient raspberry juice to run down through the glasses and color the cream. On top place a spoonful of plain vanilla ice cream and garnish with a fresh raspberry or two.

Date Custard Pie.—Cook one-third of a pound of dates washed and stoned with two cupfuls of milk in a double boiler. Rub through a sieve, add two beaten eggs, salt and suger to taste with a grating of nutmeg or a bit of cinnamon. Bake in one crust and cover with a meringue in which a few marshmallows are placed. Brown lightly.

Prune Whip Parfait.—Mash after stoning one-half cupful of stewed prunes, add one-half cupful of stewed raisins, a pinch of salt, eight marshmallows cut up in half a cupful of cream and steamed until soft, then beaten smooth. Into the marshmallow mixture whip the other ingredients. Set on ice to chill. Serve with chopped nuts.

When stirring food in a small dish on the stove steady it by using a clothespin.

JUNIOR BACON'S HELP

Since the time when Brother Bacon had had such a scare from the old wolf and had been almost afraid that he was going to be a breakfast for a Mrs. Wolf, he had been a very good pig and had stayed at home in the pig pen.

Of course you must remember that this was not the father Brother Bacon. This was the original Brother Bacon's son, and even he was growing up now.

Yes, his adventures were scarcely over before he seemed almost too big to tell of them as little pig adventures.

Brother Bacon's son was sometimes called Junior Bacon, and sometimes just Brother Bacon. It was easy enough to tell them apart.

Sometimes they were called Big Brother Bacon and Little Brother Bacon.

But I think it will be easiest if we say Brother Bacon Junior, or else Junior Bacon.

Maybe we will decide on the last name as being the shortest of all.

"Mother," squealed Junior Bacon one morning, "Mother Pig!"

"What is it?" asked his mother. "I thought you were not going to bother me any more."

"Well," said Junior Bacon, "I would like to take a sun bath."

"That shows some sense, anyway," said the mother. "I agree with your

"Good Morning," He Grunted.

great grandfather Porky, I do not like these pigs who want to take baths in water or who are willing to be clean.

"I cannot understand using water when there is mud, cool, wonderful mud."

Mother Pig grunted with delight thinking about it.

"Well, then may I go, mother? There is a black creature over in the barnyard taking a sun bath just where I'd like to go.

"He looks like a nice creature. He just sleeps in the sunshine. He doesn't seem to chatter and talk the way some of the silly animals are forever doing."

"You're doing enough chattering yourself," said his mother, "but that is like some creatures who say others talk too much when they're apt to talk all the time themselves.

"But be off now, and that black creature is a good, lazy cat. You may lie down in the sunshine near him."

Off went Junior Bacon to the spot where the cat was.

"Good morning," he grunted "How are you, may I ask?"

"Me-ow, I'm well; you may ask that, but don't bother me any more. I must sleep all the afternoon. Nothing could wake me up now."

A song sparrow had been flying nearby, and had been very anxious to get some crumbs that were lying around the barnyard. Now, when Mr. Song Sparrow heard the cat say that nothing could wake him up, he began to hover very near the crumbs.

Soon he stooped and picked up a crumb in his beak, but with a bound the cat was off—and almost, almost got him by the tail. Just in time, though, Junior Bacon had given a great squeal of fear and the song sparrow had flown off.

"Me-ow," snarled the cat, "can't you leave me alone?"

"I never touched you," grunted Junior Bacon. "My life was saved once—and I don't object to birds.

"They're not my best friends. They're too high above me.

"But you shouldn't kill them. Why don't you sleep as you said you wanted to do? Now, if you disturb me again, I'll leave you."

"A pig is not such fine company," snarled the cat angrily as he pretended to take another nap.

But the song sparrows were grateful indeed to Junior Bacon and his squealing warning which had saved them from the cat.

No Hope

"Oh, Mister Officer, I've lost my doggie."

"That's all right. Put a want ad in the paper."

"Oh, but Petsy can't read."

All's Well!

Mother—Johnnie, see what the baby has in his mouth.

Johnnie—It's all right, mother, it's only a safety pin.—Good Hardware.

A spray a day - Keeps skeets away

DON'T let mosquitoes ruin your summer. Keep your bed rooms free from all insects. Spray Flit.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills *all* the insects—and does it quickly.

Get a Flit can and sprayer today. For sale everywhere.

Flower-Lit

In June and early July, the most constant lights of the night are the pale midsummer blossoms. The glory of the moon and stars is cut short by late sunsets and early dawns; and the Plough, which is the genius of night in our northern skies, has scarcely begun to swing low across the north, as best we know it, before it is sponged out by morning. But as soon as the twilight falls, whether the night be fair or cloudy, the white flowers shine forth in the meadows and about the woodsides, and earth stands lit till morning with their drowsier stars and moons. —Anthony Collett, in "The Changing Year."

Anoint the eyelids with Roman Eye Balsam at night and see how refreshed and strengthened your eyes are in the morning. Send now to 372 Pearl St., N. Y. Adv.

Visitor—I see you are putting up many new buildings in these parts.

Workman—Yes, sir. New buildings is the only kind we puts up.

Love at first sight is hazardous—if one isn't a very good judge of character.

Off His Mental Chow

The cruising college sailing from New York next October will be on the high seas for the greater part of eight months. One can hear some of the less rugged scholars even now feebly piping: "Steward, I don't feel well enough for the whole economics course; just serve me one page of Greek and an orange in my stateroom, please."—New York Sun.

Your shoes feel easy if you use ALLEN'S FOOT-EASE

Stops the pain of Corns and Bunions and you can walk all day in ease and comfort. Nothing gives such relief to hot, tired, aching, inflamed or swollen feet, blisters or calluses. A little ALLEN'S FOOT-EASE sprinkled in each shoe in the morning will make you forget about tight shoes. It takes the friction from the shoe. Always use it for Dancing and to Break in New Shoes. For Free sample and a Foot-Ease Walking Doll, address ALLEN'S FOOT-EASE, Le Roy, N. Y.

Artificial Diamonds

At the Roechling steel works, in Wetzlar, Germany, artificial diamonds are being made with some degree of economic success. The diamonds are within a fraction of the hardness of true diamonds, being 9.9, as compared with 10 for genuine stones. The artificial gems are made of an alloy of wolframite and compare in work and luster favorably with genuine diafonds. The cost of manufacturing them is said to be reasonable on a commercial scale.

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Proven directions on each package. Physicians everywhere recommend it.

DALY CITY

NEWS NOTES OF PERSONAL INTEREST

By MARC WORST

L. Ross spent the Fourth at Galt.

G. P. Baker and family have moved to 139 Crocker avenue.

J. J. Kennedy spent the Fourth with his family in Big Basin.

Miss Marble, of Oregon, is visiting her aunt, Mrs. C. Ross, of 7 Cloverdale avenue.

Mr. and Mrs. William Sherwood, of 231 Los Olivos avenue, spent the Fourth in Fairfax.

Mr. and Mrs. M. E Walker, of 31 Vendome avenue, motored to Oregon last week to visit friends.

N. Wegner and Teddy Rolfe motored to San Jose last Sunday to visit Mrs. Wegner, who is spending her vacation there

Mr. and Mrs. Chas. D. McKee and family, of 29 Irvington stret, returned Monday evening from a two weeks trip to Pasadena and San Diego.

Mrs. L. Cook, water clerk, spent the Fourth at Lake Tahoe.

Evelyn and Irene Smith returned from their vacation last Sunday.

Mrs. Marino, of 47 Vista Grande avenue, has gone to New York for a month's visit.

Miss Mary Brennan, Miss Gertrude Murphy and friends motored to La Honda last Monday.

Charles Reinhart and family, of Brunswick street, are visiting Mr. and Mrs. Fuhr, near Shasta Springs.

M. MacDonald has sold his house at 14 Vendome avenue and purchased another at 20 Vendome from C. Johns.

Messrs. H. Fellows, Metcalf and Winton visited Fresno, Bakersfield, Santa Barbara and other southern cities on a trip over the Fourth.

Charles Langley, of the Daly City water department, has returned from his vacation in Yuba county, and reports having had a splendid time.

Building permits have been issued to John Cairns, 199 Knowles avenue, for alterations, and to C. A. Erickson, 169 Park avenue, for the erection of a garage.

Marshal Doyle wishes all of those residents of Daly City who are leaving on their vacations to notify him, so he can keep watch over their property during their absence.

The City Hall is being replastered, retinted and generally repaired this week, and when finished it is expected it will present a vastly improved appearance.

H. Romeguiere and W. Murphy spent the Fourth in Guerneyville.

F. H. Ray has purchased M. MacDonald's home at 14 Vendome avenue.

A. Murphy is leaving next Monday for a two weeks' vacation at Salt Lake City.

Masie Murray, of Crocker Tract, has just returned from her vacation at La Honda.

Mrs. Wiser spent the Fourth at Monte Rio and Sebastopol, visiting friends at the latter place.

Business licenses are now due, and can be paid to Marshal Doyle at his office between the hours of 10 and 12 a. m. and 1 and 5 p. m.

Marshal Doyle has returned from his vacation in Santa Cruz. He reports having had a very enjoyable time and is now ready for business again.

Alex Doskoris, of Pete's Restaurant, has purchased a new Chrysler coupe and plans an extended trip through British Columbia and other parts of Canada.

Mrs. E. Burns has recently purchased one of the homes built by W. Raffeto, at 77 Acton street. She plans to move into her new home as soon as possible.

W. Thomson is on a visit to his family at 259 Evergreen. He is working in Southern California, and has come ot spend his two weeks vacation at home.

The afternoon whist given Wednesday at St. Maximus church hall under the supervision of Mrs. Roberson was very well attended and a success in every way.

Mamie Lang, superintendent of elementary education, who spoke at the graduation of the Woodrow Wilson and Colma schools, died last week following an operation.

The grading is under way at the Jefferson Union high school for two handball courts and one tennis court. At the rate work is going on the courts will soon be completed.

Mr. and Mrs. William Freshman and Mr. and Mrs. Fred Sotter spent the Fourth, Saturday, Sunday and Monday, with Mrs. Freshman's sister, Mrs. J. L. Brown, at Ross, Marin county.

Mr. and Mrs. Walter Kirsten, of Findlay, Ohio, with Prof. and Mrs. D. F. Gatchell, of Centerville, Cal., visited in the Manse with Mr. and Mrs. Chas. H. Gatchell on Monday of this week.

The monthly whist party given by St. Maximus church in the City Hall, Wednesday, July 6, under the supervision of Mrs. M. Murphy, was a decided success, a very large crowd being in attendance.

Miss Panella, Mrs A. Milo's niece, who has been visiting her aunt, passed the county examination recently. This entitles her to teach in the elementary schools next term. She will fill a position in Sonoma county.

R. C. MacArthur, manager of the Liberty Bank, Daly City branch, is taking a two weeks vacation. His vacation plans were somewhat disarranged, due to the fact that he has suffered and infection of his right foot, but it is hoped that a few days rest will result in a complete recovery.

Daly City was free from the selling of fireworks during the Fourth of July holidays, but it semed impossible to keep the children from using firecrackers, as they were easily obtainable over the line. As a further protective measure, Marshal Doyle hopes that parents will instruct their children not to throw rocks and not to damage property during the vacation period. Much property has been destroyed by minors, and the parents will be held responsible.

El Carmelo Parlor No. 181, Native Daughters of the Golden West, will hold a huge whist party and dance in the Daly City Auditorium on Wednesday evening, August 11, at 9 o'clock sharp. Many very handsome presents will be given away. Invitations are extended to all friends and members to attend. Dancing will begin at 10:30. Miss Laura D. Figoni, Major of El Carmelo's drill team, is chairman of this event, and will be assisted by various sub-committees from the Parlor.

Mayor H. H. Smith expects to meet with representatives of the San Francisco board of supervisors and members of the city engineering board some time this week. The object of the meeting is to discuss plans for developing San Mateo avenue. As there is no cut-off through to Junipero Serra boulevard from School street to Ocean avenue, San Mateo avenue is the best possible place to connect Mission street with the Junipero Sierra boulevard. There have been many objections from the Spring Valley Water Company to people going through their property. At present that is the only way possible. At this meeting the committee and Mayor Smith will decide upon the best way to make this connection.

Mrs. Eldrup and family are enjoying their vacation at La Honda.

Mrs. Godfrey and family and Mrs. Denning and family spent the Fourth at Guerneyville.

Mrs. S. Olmos, of Santa Rosa, visited Mrs. P. Ross, of 1027 Hanover street, Wednesday.

Mr. and Mrs. C. A. Bradberg, of 208 Hillcrest Drive, spent the Fourth at Capitola by the Sea.

Mrs. M. Murray and son Andrew, Mrs. Griffin and little Miss Patricia Cuchrane spent Thursday in Sunnyvale.

The whist to be given next Wednesday afternoon at St. Maximus church will be under the supervision of Mrs. Fahey.

Mr. and Mrs. R. C. Fletcher are the proud parents of a baby girl, born Sunday, July 4, at their home, 216 Templeton avenue.

Mrs. N. Greene, Mrs. Sanders and Mrs. Ross spent Thursday at Emerald Lake. They were entertained at the club house and spent the day sightseeing.

The next monthly whist to be given by the Woodrow Wilson-Vista Grande P. T. A. will be held Tuesday, July 13, at Ryan's Hall, corner of Mission street and Knowles avenue. The room down-stairs, formerly used as a school room, will be utilized for these whist parties The game will start at 2 o'clock, and a good time is anticipated, so do not miss this party.

INSTALLS LARGEST PRESSING MACHINE ON THE MARKET

Finding it necessary, because of the increase in business, to install larger and more modern machinery, the Thomas Jefferson Cleaning Works has installed the largest and most modern pressing machine on the market, and is now able to take care of the ever-increasing business in first class order. The new machine turns out the garments faster and better than ever. The Thomas Jefferson Cleaning Works has been in operation in Daly City for six years, and has always kept pace with the progress of the community. Mr. and Mrs. J. Beeson, who conduct this establishment, desire to thank their customers for their past patronage, and promise a continuance of the satisfactory service of the past.

RADIO EXPOSITION TO BE HELD IN SAN FRANCISCO

The radio industry is looking to California is one of the outstanding all-the-year-round markets and one of the centers of the greatest radio developments. This is the statement of the Pacific Radio Trades Association, which is giving the third annual Pacific radio exposition in San Francisco next August 21st to 28th.

California has an equable climate throughout the year that makes for the most satisfactory radio reception, it is declared. There are no periods of intense heat or extreme variations in temperature such as create problems for the radio user in other sections of the country.

In view of the strategic importance of California in radio, both manufacturers and distributors are taking an unusual interest in the exposition to be held next month. Coupled with this is the fact that it will be the first show of its kind this season in the United States, and the first opportunity of the industry to make the initial showing of the seanson's new models.

The exposition, which has the endorsement of the Radio Manufacturers' Association, is being planned on a scale that will give it a place among shows of this character commensurate with the position of California in the radio market, it is said. Officers of the Pacific Radio Trade Association are confident that it will rank in scope and dignity with those of New York and Chicago.

It is planned to make the exposition one of action, from the time the doors open in the afternoon until they close at night. This is to be accomplished through an array of special events and through the co-operation of the various exhibitors, and the radio broadcasting stations.

The indications are now that the opening of the exposition will find the space of the auditorium oversubscribed. At the present time all the space in the main arena has now been taken and a large volume of applications have been received for the side halls.

Our Own Question-Box: Q. What is auto-suggestion? A. Advice to the driver, usually emanating from the back seat.

New York buys more salt than any other state, but Pennsylvania evidently has spent the most money for Pepper.

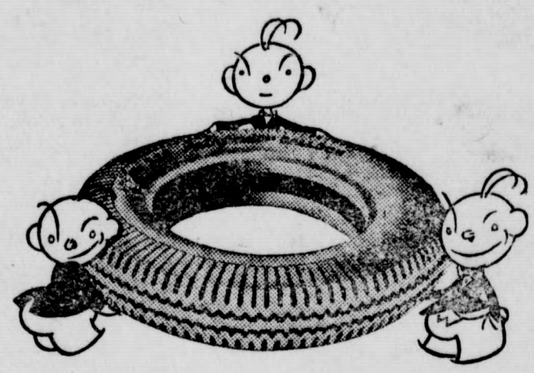
DALY CITY BRANCH



WHENEVER they tell us
ABOUT the wonderful
BARGAIN they got
IN a tire from a
MAIL order house
WE smile
AND agree with 'em
FOR they do get a
PRETTY good tire
BUT then we figure
THINGS like
PARCEL Post
MONEY orders
POSTAGE
A desperate struggle
IN mounting the tire
WITH many a cuss word
OR two
HEAVY strokes
ON the hand pump
150 or so
AND no service
FROM the mail order house
SUCH as we offer

THEN we show 'em
A PATHFINDER
MADE by the world's
LARGEST tire factory
AND guaranteed
AND backed by
OUR service
WHICH makes long mileage
CERTAIN
ALL for $10.25
IF it's a 30x3½
PATHFINDER Cord
$15.00 for a 29x4.40
PATHFINDER Balloon
AND other sizes
EQUALLY low
THEY look at the tires
AND look at us
AND smile and we know
WHERE they'll buy
THEIR next tire bargain
AND they'll thank us
WHEN they buy it here.
